

McKenzie County, ND Local Emergency Operations Plan

Revised in 2018 with assistance
from:

HEARTLAND
CONSULTING GROUP, LLC

701-934-5173

Forward

The Local Emergency Operations Plan (LEOP) establishes a framework for the McKenzie County government and its partners to provide assistance in an expeditious manner in event of a perceived, potential or actual disaster or emergency. The McKenzie County Emergency Manager appreciates the continuing cooperation and support from all departments and agencies and from the volunteer and private organizations which have contributed to the McKenzie County level of preparedness and to the development of this Plan. The McKenzie County Emergency Manager continually works alongside these entities to address the responsibilities outlined in this LEOP, provide a forum for discussion, and an opportunity to participate in planning and exercise activities to help ensure the McKenzie County prevention, preparedness, response, recovery and mitigation capabilities are effective and efficient.

The purpose of the LEOP is to provide strategic and operational guidance aimed at facilitating the delivery of all types of McKenzie County emergency management assistance to the residents and visitors of McKenzie County and others with whom there are mutual aid agreements/compacts in place, and to help reduce the consequences of disasters and emergencies. This Plan outlines the planning assumptions, policies, concept of operations, organizational structures and the roles and responsibilities of all those involved in coordinating federal, regional, state and McKenzie County activities.

The copies of the LEOP used by government officials include personal contact information. Copies requested under the North Dakota Open Records Law do not include personal contact information to maintain privacy. Personal contact information may be requested from the McKenzie County Emergency Manager and granted if the reason for the request is deemed to be valid.

Section 16, Distribution List

Section 17, Roles and Responsibilities

Section 18, Incident/Hazard Agency Lead and Support Responsibilities by Hazard

Section 19, Evacuation and Sheltering

Section 20, Acronyms and Glossary of Terms

1.0 Introduction

The LEOP establishes the jurisdictions strategy to prevent, protect, prepare for, respond to, recover from, and mitigate the impacts of a wide variety of disasters and other emergencies that could adversely affect the health, safety and/or general welfare of the residents and visitors of McKenzie County.

The priorities that guide the emergency management practice for McKenzie County include:

- ▲ Reduce the loss of life and property of residents, property owners, businesses and visitors due to natural, technological, and/or man-made disasters
- ▲ Incident stabilization
- ▲ Environmental conservation
- ▲ Assist in recovering from emergency situations through an immediate and coordinated restoration and rehabilitation of affected persons, businesses and properties

1.1 PURPOSE

The LEOP establishes policies and procedures, it describes strategies, assumptions, objectives, and how this plan supports the five phases of emergency management (Prevention, Mitigation, Preparedness/Protection, Response and Recovery). It also describes the Federal documents the LEOP follows including: National Incident Management System (NIMS), Incident Command System (ICS), Emergency Support Function (ESF), and Department of Homeland Security's (DHS) National Response Framework (NRF).

The LEOP establishes interagency and multi-jurisdictional mechanisms for county, township, and city governments involved in coordination of incident support activities. This includes coordination structures and processes for disasters or other emergencies requiring:

- ▲ Emergency support to residents and visitors
- ▲ The exercise of direct Local authorities and responsibilities, as appropriate under the law
- ▲ Public and private-sector incident management integration
- ▲ Coordination, administration, and integration of emergency management plans and programs of Federal and State agencies.

1.2 SCOPE

- ▲ This is an operations-based plan that follows National Incident Management System (NIMS), Incident Command System (ICS), and NRF guidelines, incorporates the ESF's other functional groups, as well as incident specific actions.

- ▲ The LEOP also calls for regularly scheduled exercises and training to identify and enhance the capabilities of local relevant stakeholders when managing with emergency situations. It defines the responsibilities of local agencies, non-governmental organizations and partners from both the public and private sectors. In addition, the LEOP recognizes and incorporates the various jurisdictional and functional authorities of local departments and agencies, and private-sector organizations during an incident.
- ▲ This Plan does not contain resource inventories, specific operating instructions, or personnel directories. Logistics, techniques, methodologies, and implementation strategies are components of organizational guideline manuals. Development of these “Standard Operating Guidelines” (SOGs) is the responsibility of each individual agency identified within the LEOP.

1.3 PLAN ASSUMPTIONS

Proper implementation of this plan will reduce or prevent loss of life, damage to property and the environment. Key officials within McKenzie County are aware of the possible occurrence of any emergency or major disaster and their responsibilities in the execution of this plan.

- ▲ The McKenzie County Commission has overall statutory responsibility for the continued use, development and maintenance of this plan. Delegation of responsibilities to department heads does not abrogate the authority of heads of local governments to make necessary decisions or changes to the plan for the protection of life, property and the environment.
- ▲ The contents of this plan must be known and understood by those people responsible for its implementation. The emergency manager is responsible for briefing personnel and county officials concerning their role in emergency management and the contents of this plan in particular.
- ▲ The plan shall incorporate the use of ICS, allowing flexibility for response to a variety of emergencies;
- ▲ Department heads are responsible for development and maintenance of their respective functions and tasks in this plan.
- ▲ In addition, each lead and support agency must maintain supporting Standard Operating Guidelines (SOGs) describing how functions/tasks will be accomplished or implemented. SOGs are located at appropriate functional facility locations and will be updated yearly by the appropriate coordinator.
- ▲ An annual review of this plan will be conducted by all officials involved in its execution. The emergency manager will coordinate this review and any revision and distribution found necessary.
- ▲ The plan will be tested at least once a year in the form of a simulated emergency exercise in order to provide practical, controlled experience to functional coordinators and task coordinators responsible for plan maintenance and response. This will be the responsibility of the McKenzie County Emergency Manager to coordinate such activity.

2.0 Construct of the Plan

This Plan is organized to align with the operational structure and makeup of the McKenzie County Emergency Operations Center (EOC). This Plan provides general information as well as specific operational roles and responsibilities for select EOC sections, groups, and Emergency Support Functions. The main purpose of the Local Emergency Operations Plan is to define “who does what” in an emergency/disaster situation. How each agency carries out its responsibilities is defined in the agency Standard Operating Guidelines.

The LEOP includes the 20 Sections which describe the structure and processes designed to integrate the efforts and resources of the Federal, State, McKenzie County, and city governments, the private sector and non-governmental organizations (NGO’s). The Plan includes planning assumptions, roles and responsibilities, concept of operations, incident management actions, and Plan administration and maintenance instructions.

Also included are the Emergency Support Functions which describe the responsibilities and general concepts for emergency management activities and obligations maintained by each individual function. These responsibilities include reduction of the immediate hazard, saving lives and property, incident stabilization, environmental and economic conservation and restoration of pre-incident conditions. The Emergency Support Functions are comprised of 15 specific functional areas.

2.2 HAZARD ANALYSIS

In 2016, McKenzie County completed the Multi-Hazard Mitigation Plan. In the process of plan development, McKenzie County conducted a hazard analysis which was repeated with the completion of the THIRA (Threat and Hazard Identification and Risk Assessment). The identification and ratings of the hazards is listed in the Table 2.4.

Table 2.2: McKenzie County Hazards

Hazard	Frequency	Severity
Communicable Disease	Unlikely	Limited
Dam Failure	Low	Low
Drought	Likely	Critical
Flooding	Likely	Limited
Geologic Hazards	Low	Low
Hazardous Materials Release	Highly Likely	Limited
Homeland Security	Likely	Critical
Severe Summer Storms (Including Tornadoes)	Highly Likely	Critical
Severe Winter Weather	Highly Likely	Critical
Shortage of Critical Materials	Unlikely	Limited
Transportation Accident	Highly Likely	Limited
Urban Fire	Likely	Limited
Wild Land Fire	Likely	Limited
Windstorms	Highly Likely	Limited

260201	Tape, Transparent, 1" x 10yd (12RL/BX)	Bx	1	20 Bx	

5.0 Concept of Operations

5.1 EMERGENCY OPERATIONS

5.1.1 Operational Policies

It is the responsibility of government to protect life, property and the environment from the effects of hazardous events using the five phases of emergency management: prevention, preparedness, response, recovery and mitigation. This plan is based on the concept that the emergency functions performed by various groups responding to an emergency will generally parallel their normal day-to-day functions. To the extent possible, the same personnel and material resources will be employed in both cases

This plan incorporates the principles of the National Incident Management System (NIMS), a nationwide approach to domestic incident management; applicable at all jurisdictional levels and across functional disciplines in an all-hazards context. It is not an operational incident management or resource allocation plan. NIMS represents a core set of doctrines, principles, terminology and organizational processes to enable effective, efficient and collaborative incident management at all levels. NIMS provide a consistent nationwide template to enable all government, private sector, and non-governmental organizations to respond to emergencies and disasters.

The NIMS operational components include the Incident Command System Unified Command, and Area Command.

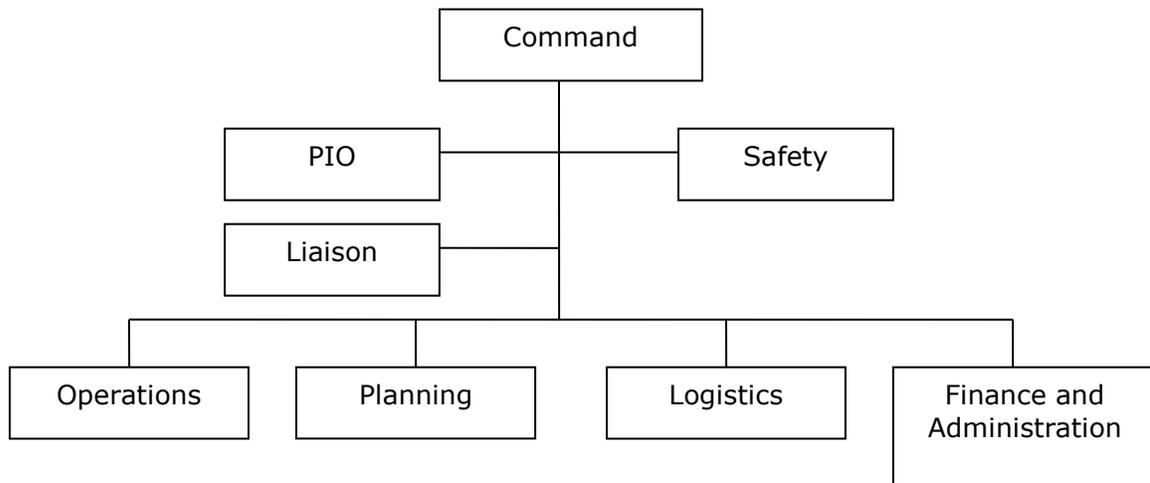

5.1.2 National Incident Management System (NIMS)

NIMS is the national model for Preparedness, Communications and Information Management, Resource Management, and Command and Management. The Incident Command System (ICS) established by NIMS; is the model for command, control, and coordination for an emergency response. This system provides a means to coordinate the efforts of individual agencies as they work toward stabilizing the incident, protecting life, property, and the environment. ICS uses principles known to improve efficiency and effectiveness in an emergency response. Due to the increased complexity of events occurring in McKenzie County and North Dakota and the number of agencies/departments with a responsibility to act, the jurisdiction utilizes ICS as the operational system to manage disaster and emergency incidents.

5.1.3 Incident Command System (ICS)

The Incident Command System is considered the most effective system for managing emergencies. The Federal Emergency Management Agency (FEMA) ICS is used as a standard for emergency Management Operations. McKenzie County Government subscribes to the use of ICS an important part of NIMS. ICS is a standardized, flexible, on-scene, all-hazard incident management concept. ICS allows its users to adopt an integrated organizational structure to match the complexities and demands of single or multiple incidents without being hindered by jurisdictional boundaries. McKenzie County Government has identified NIMS/ICS structures for identified hazards. The ICS organization is demonstrated in the chart below:

Figure 5.1: Incident Command Structure

The Incident Command and Management organization is located at the Incident Command Post (ICP). Incident Command directs operations from the ICP, which is generally located at or in the immediate vicinity of the incident site. Typically, one ICP is established for each incident.

As emergency management/response personnel deploy, they must, regardless of agency affiliation, report to and check in at the designated location and receive an assignment in accordance with the established procedures.

The Incident Commander (IC) at the incident site will be trained according to NIMS requirements. In like manner, the EOC staff will also be trained to NIMS requirements.

The Incident Command System (ICS) should have:

- ▲ A manageable span of control (3 to 7 staff; optimum is 5);
- ▲ Personnel accountability (each person reports to only one person in the chain of command); and
- ▲ Functional positions staffed only when needed (responsibilities for any positions that are not staffed remain with the next higher filled position).

5.1.4 Unified Command System (UCS)

A Unified Command System, part of ICS, is established upon activation response to an incident where two or more response agencies have a major response role. This system encourages agencies with responsibility for the incident to participate jointly and equally in the decision making process. Under a Unified Command, agencies work together through the designated members of the Unified Command to analyze information and establish a common set of objectives and strategies.

5.1.5 Area Command (Unified Area Command)

An organization established (1) to oversee the management of multiple incidents that are each being handled by an ICS organization or (2) to oversee the management of large or multiple incidents to which several Incident Management Teams have been assigned. Area Command has the responsibility to set overall strategy and priorities, allocate critical resources according to priorities, ensure that incidents are properly managed, and ensure that objectives are met and strategies followed. Area Command becomes Unified Area Command when incidents are multi-jurisdictional. Area Command may be established at an emergency operations center facility or at some location other than an incident command post.

5.1.6 Coordination

Coordination is a broad function involving staff members engaged in both direction and control. Some situations might require an Incident Commander to execute coordinating functions. In times of disasters or other emergencies, there are several levels of coordination involved with the administration of this Plan. They work through three levels from local, to State, and finally to federal authorities, when required. Coordination usually requires the activation of the Emergency Operations Center (EOC).

The emergency manager is responsible for maintaining a common operating picture and coordinating local response efforts. Primarily, this role encompasses two areas of coordination. First, the emergency manager works with local responders to ensure internal cooperation and functional teamwork in support of the Incident Commander. Secondly, the emergency manager arranges for outside assistance when the need arises and/or when

requested by the Incident Commander, through mutual aid or through Regional and/or State Response after declaration of an Emergency or Disaster Declaration is by the County Commission or City Council. The 30 McKenzie County Townships and the six McKenzie County Cities have historically worked with and through the county government when emergency and disaster declarations are written and declared.

5.1.7 McKenzie County Emergency Operations Center

When an incident occurs, emergency notification is often carried out by individuals on the scene dialing 911. 911 calls are directed to State Radio Communications who then contact the appropriate McKenzie County response agencies such as law enforcement, fire, and/or emergency medical services. McKenzie County also has a local dispatch center which handles local emergency calls. If the first responders need assistance from other agencies such as law enforcement needing fire department response that call is made through McKenzie County radio communications or telephone. If the incident is of a magnitude whereby support is needed to the responding agencies the Emergency Manager is notified of the incident and will use his/her judgment to activate the McKenzie County Emergency Operations Center. The emergency manager may consult the County Commission Chairperson regarding EOC activation especially in anticipated lengthy activations.

When the emergency manager receives notice of a potential emergency from the federal Homeland Security Advisory System, from the National Weather Service watches and warnings, or from other reliable sources, partial activation of the EOC in preparation for the emergency may be considered.

Operational reports and resource requests are made to the State Emergency Operations Center are made through WebEOC.

The EOC provides a central location from which government at the county and city levels can provide interagency coordination and executive decision-making in support of the incident response. The McKenzie County EOC is located in the Yellowstone Room at the McKenzie County Courthouse.

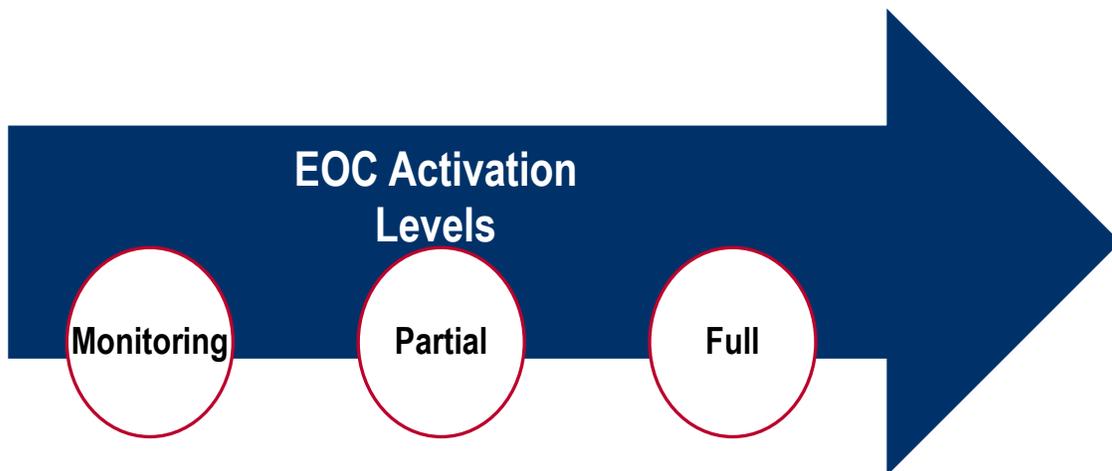

The Emergency Operations Center (EOC) will be activated for all incidents requiring a significant dedication of resources and/or extraordinary interagency coordination outside the realm of normal day-to-day emergency situations responded to by law enforcement, fire, public works, and EMS agencies. The EOC will house the members of the Functional Coordinators and others deemed necessary based on the incident.

The Emergency Manager or designee with input to the County Commission may communicate with the public to disseminate emergency information for public safety. The method of communication may include social media, mainly face book. The EOC staff has available as tools to disseminate emergency public information EAS, IPAWS, and Ever bridge (Reverse 911).

Not all disasters require full activation, in those instances, partial EOC activation may be ordered and only relevant agencies will be activated. The stages of EOC Activation are:

- ▲ **Monitoring:** The McKenzie County EOC not activated. The emergency management staff is monitoring situational awareness on a 24/7 basis.
- ▲ **Partial Activation:** The McKenzie County EOC partially activated. All ESF's and/or Support Agencies are notified and requested as the situation warrants. Partial activation staffing will be determined to meet the needs of the situation.
- ▲ **Full Activation:** The McKenzie County EOC is fully activated. All ESF's and/or Support Agencies are notified and requested as the situation warrants. Full activation may require extended hours, possibly 24-hour staffing in order to meet the needs of the situation.

Figure 5.2: EOC Activation

The EOC does not command or control the on-scene response. The EOC carries out the coordination function. EOC officials coordinate with on-scene incident managers and other agencies and organizations.

Decision making at the EOC affects the incident response as well as the public response. The decisions made at the EOC are not tactical decisions.

Tactical decisions are made by the Incident Commander and the Command Staff at the incident scene.

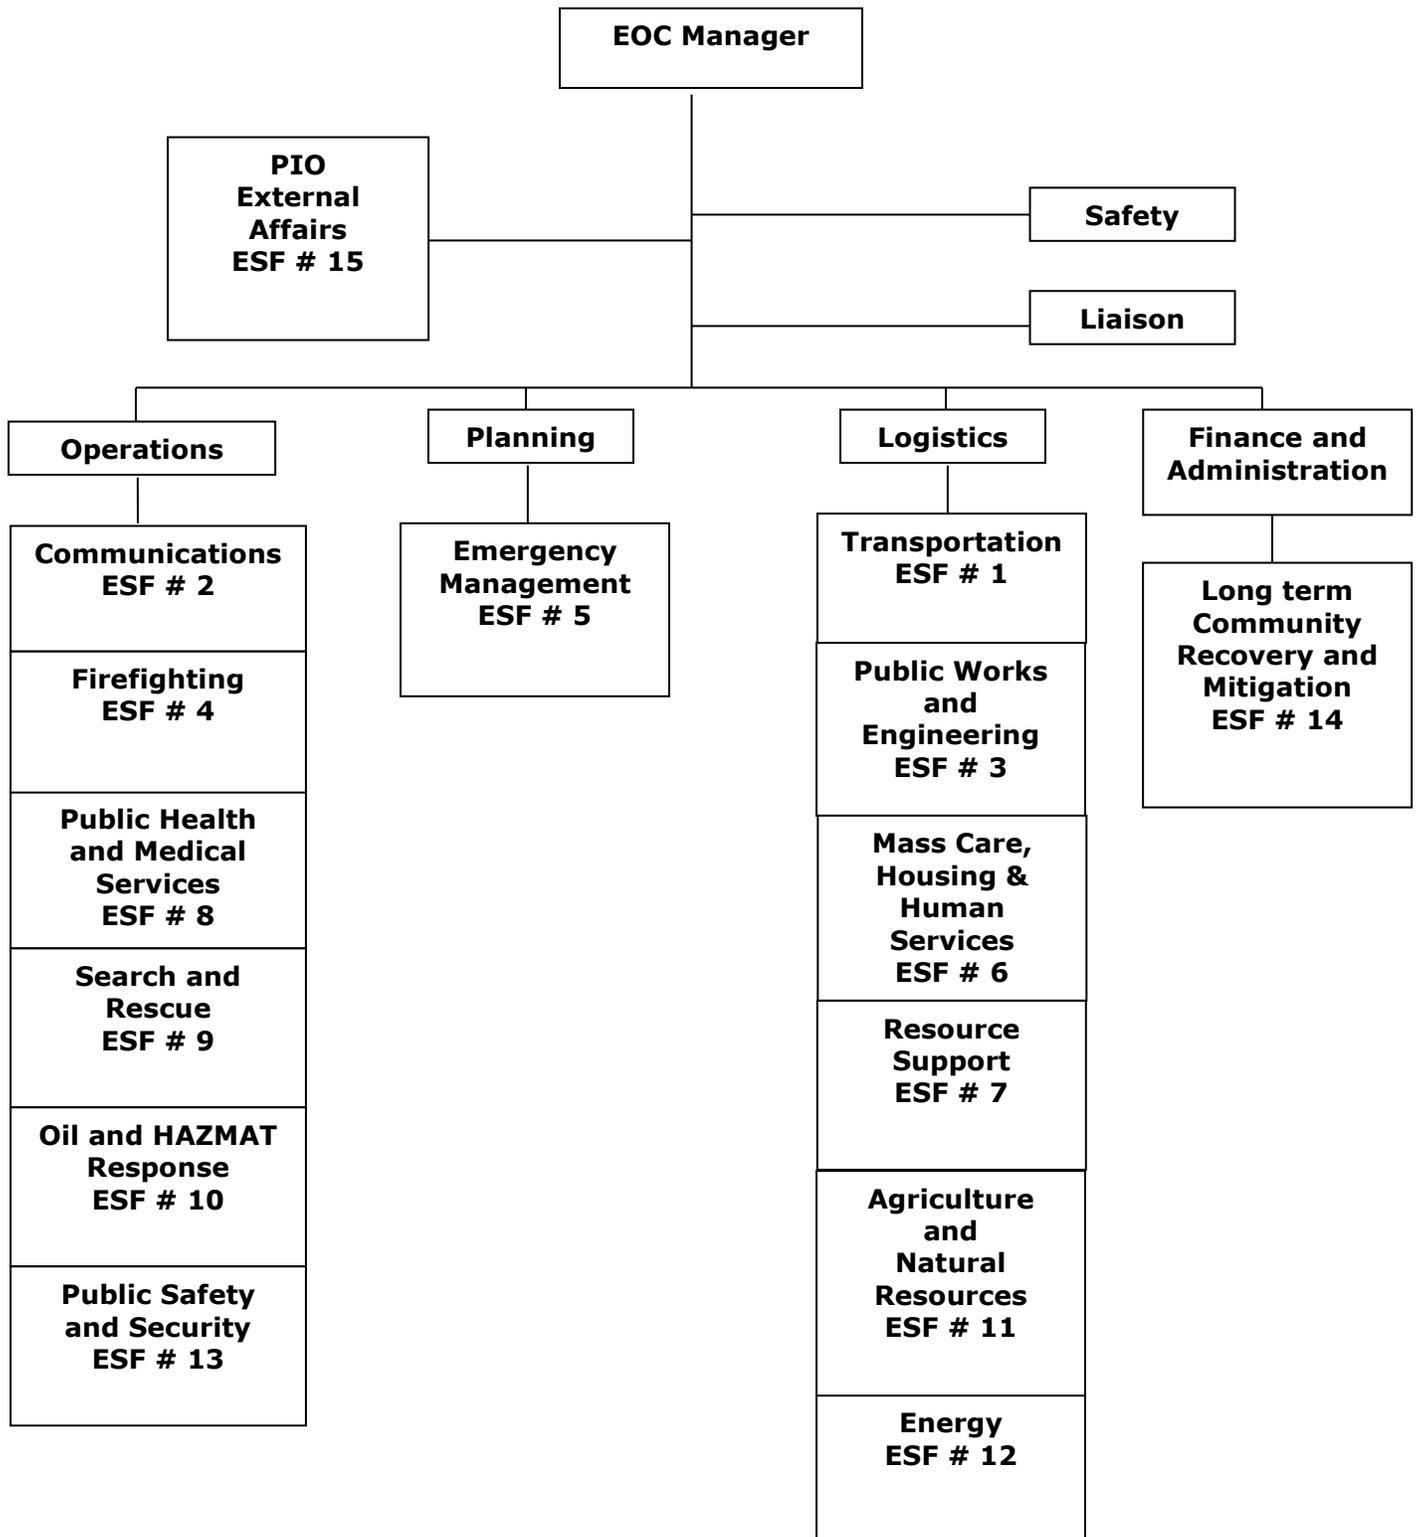

McKenzie County EOC staff's responsibilities allow the Incident Commander to focus on managing the incident. Those responsibilities include:

- ▲ Coordinate the efforts of multiple agencies or organizations involved in the incident
- ▲ Provide emergency public information to the public
- ▲ Support the on-scene response
- ▲ Play an important role in information collection and evaluation
- ▲ Set priorities for incident response
- ▲ Acquire, allocate, and track resources or otherwise manage resources
- ▲ Provide legal and financial support
- ▲ Provide strategic guidance and direction to support incident management activities
- ▲ Liaison with other jurisdictions and other levels of government
- ▲ Serve as a conduit for information passed from the incident scene, through lower-level coordination agencies, to higher-level coordination entities
- ▲ Document the incident utilizing WebEOC

5.1.8 McKenzie County Alternate EOC

If the EOC is unable to function because of disaster damage, utility unavailability, or danger to the EOC staff, one alternate McKenzie County EOC is designated. The Alternate EOC has the same functions as the regular EOC. The designated location is being selected. The diagram below demonstrates the EOC and how it is organized according to the NIMS Incident Command System.

Figure 5.3: EOC Organization

5.1.9 Organization and Assignment of Responsibilities

The McKenzie County EOC provides a central location from which McKenzie County government can provide interagency coordination and executive decision-making in support of incident response.

This plan embraces an “all-hazards” principle: that most emergency response functions are similar, regardless of the hazard. The McKenzie County Emergency Manager will mobilize resources and personnel as required by the emergency situation.

The McKenzie County Emergency Manager and elected officials will develop mutual aid agreements with adjacent municipalities for reciprocal emergency assistance as needed.

When the county EOC is activated, the McKenzie County Emergency Manager or designee will coordinate between the site IC, adjacent counties, and the North Dakota Department of Emergency Services. To ensure consistency with operations at the incident site, the EOC will also follow an incident command structure. The McKenzie County Emergency Manager will assume the role of EOC Manager (Command) and, initially, all of the remaining roles. As additional staff arrives at the EOC, the McKenzie County Emergency Manager may delegate activities to them.

Availability of staff and operational needs may allow or require positions to be combined, or positions to not be filled (responsibilities held by the next higher position).

In order to maintain civil order and control, it is imperative for all levels of government to identify clear lines of succession and establish the mechanisms to ensure government continues to function during emergencies and/or disasters.

The succession of leadership for the county commissioners is:

- Chair
- Vice chair
- Most senior member of commission

The succession of leadership for City Governments is:

- Mayor, President of city council
- Most senior member of council

The succession of leadership for EOC management personnel is:

- Emergency manager
- Veterans’ Service Officer

☐ Sheriff

The line of succession for each agency/department is according to the department rules and/or Stand Operating Guidelines. Each county/city functional coordinator will have a designated alternate to fulfill assigned responsibilities.

During non-emergency times, information regarding emergency plans and actions to be taken by the public, in the form of public information / education materials, will be provided to the public via newsletters, brochures, county website, and other means.

In the event of an evacuation, the population (or segments thereof) will evacuate using their own vehicles, or be transported from the identified affected area(s) to safe havens. Depending upon the hazard factors, the host areas may be located within or outside the affected community or even the county.

Evacuees are expected to follow the direction and guidance of emergency workers, traffic coordinators, and other assigned emergency officials. Pre-designated evacuation routes will be utilized whenever safe and practical. Critical intersections will be staffed by traffic control personnel to facilitate an orderly flow of traffic.

Emergency workers should complete pre-emergency "family plans" addressing such issues as transportation and evacuation locations for immediate family members (Spouse and children).

Table 6.1 aligns Emergency Support Functions (ESF's) with ICS Staff sections. This alignment may be modified as required by the disaster situation or the municipality's political or programmatic needs.

6.0 Emergency Support Functions

The Emergency Support Functions are comprised of 15 specific functions. They are:

ESF #1 – Transportation addresses emergency-related transportation issues that include assessing damage to and restoring and maintaining land, air and water transportation routes during disasters or emergencies in coordination with governmental and private organizations, as required. In addition, ESF #1 supports evacuation and re-entry operations for threatened/involved areas and the transportation of response personnel, materials, goods and services to emergency sites.

ESF #2 – Communications and Alerting addresses the provision of communication resources and coordination to support local collaboration and information sharing. ESF #2 is also responsible for the provision of emergency warning and notifications to the public and response personnel as well as the back-up, restoration and repair of some communication infrastructure.

ESF #3 – Public Works and Engineering addresses most engineering concerns that are not related to transportation systems and becomes involved in a wide array of mission types in response and recovery efforts. These missions include inspection and assessment; debris removal management; demolition and stabilization; reconnaissance; emergency repairs; and, temporary and permanent construction.

ESF #4 – Firefighting addresses fire suppression in rural, urban and wild-land settings that result from naturally-occurring, technological or man-made disasters or emergencies. Local jurisdictions have the responsibility of providing basic fire service protection.

ESF #5 – Emergency Management addresses the coordination of local incident management and response efforts to support local efforts. It encompasses the coordination of activities identified in the LEOP; the operation of the EOC; incident action planning; situational awareness and information-sharing; and, provides direction and control over the use of local resources.

ESF #6 – Mass Care, Housing and Human Services addresses, coordinates and reports on the emergency mass care activities of local and partner NON-GOVERNMENT ORGANIZATIONSs responsible for sheltering, feeding, counseling, temporary housing and related social services and

welfare activities required to assist disaster clients. In addition, this ESF is responsible for the safety and well-being of household pets in shelters.

ESF #7 – Resource Support addresses support to local entities involved in emergency response and recovery. This support includes locating, procuring and issuing resources including equipment, supplies, facilities, and services required by emergency responders and disaster survivors.

ESF #8 – Health and Medical addresses public health and medical services concerns during disaster or other emergencies. Public health concerns include, but are not limited to: assessment and surveillance of health needs of the affected communities; provision of health-related services and supplies; identification of areas where health problems could occur; testing of products for public consumption; and environmental testing. Medical services' concerns include, but are not limited to: logistical support for local health personnel in the field; supply and restocking of health-related equipment and supplies; testing and/or disposal of food, medicine and other related products affected by the disaster/emergency; assistance in assessing potable water and wastewater/solid waste disposal issues and coordination of equipment; assessment of medical needs of the affected communities in coordination with local emergency medical personnel; provision of medically related services and supplies that support the affected communities; and assistance and support for mass fatality and triage sites.

ESF #9 – Search and Rescue (SAR) addresses the provision of guidance and organization of Local agencies that may be employed during SAR operations, in both urban and rural scenarios. SAR operations include, but are not limited to: the location, recovery and extrication of victims who have become lost or entrapped as a result of a disaster or life-threatening emergency; and includes swift water rescue.

ESF #10 – Hazardous Materials (HAZMAT) Response addresses different types of hazardous materials. In a hazardous materials event, responsibilities include: providing a coordinated local response in accordance with ICS; assisting in the assessment of, response to and recovery from hazardous materials incidents; ensuring that prompt measures are taken to contain, remove and dispose of spilled hazardous materials; and advising the public, in concert with local agencies, of the situation, potential dangers and protective actions they should take.

ESF #11 – Agriculture, Cultural and Natural Resources addresses concerns regarding agricultural functions during disaster or emergency situations as well as the effect of an incident upon the natural and cultural resources of the community. These concerns include: assessment and

surveillance of agriculture needs within affected areas; provision of agriculture-related services and supplies; identification and application of appropriate agriculture assistance programs; and obtaining and delivering emergency food supplies. In addition, this ESF is responsible for the care and well-being of large animals and livestock during an incident.

ESF #12 – Energy addresses the coordination of utilities and related governmental and private organizations to provide information for local-level assessment, response and recovery operations related to fuel shortages, power outages and capacity shortages that may impact residents. This ESF also provides information on the transportation of fuel, sources for the provision of emergency power to support immediate response operations, and the restoration of normal energy supplies.

ESF #13 – Public Safety and Law Enforcement addresses response and recovery activities can include the following: maintaining law and order within legal authority; assisting with the dissemination of alerts, warnings and notifications; coordinating law enforcement activities from EOCs and command centers as needed to manage resources and personnel; staffing for roadblocks, traffic control points and other sites; conducting law enforcement investigations; providing evacuation/relocation support; providing communications to support agencies; supporting the relocation and temporary detention of persons confined to correctional and/or high risk institutions; and, maintaining and protecting logs, records, digests and reports essential to government and emergency operations.

ESF #14 – Volunteer and Donations Management addresses the support of local jurisdictions in the restoration of communities damaged by a disaster or emergency by coordinating the efficient and effective delivery of donated goods and volunteer services to the impacted areas. This ESF will also be the liaison for those voluntary organizations that provide disaster services within the community, so that capabilities and resources will be effectively integrated with other local, State and federal agencies to meet the needs of the disaster or emergency.

ESF #15 – Public Information addresses support in providing residents with timely and potentially lifesaving information during major disasters or other emergencies. This ESF is also responsible for the development and dissemination of a variety of information, education, and instructions to the general public, government officials and the news media through direct contact, briefings, presentations, news releases and advisories, websites, social media postings, and oversight of public inquiry lines established in or for the support of emergency management activities.

7.0 Agency Responsibilities by Emergency/Disaster

Hazard	Lead Agencies	Support Agencies
Communicable Disease	County Health Nurse, Upper Missouri District Health Unit	Emergency Manager, Sheriff, Social Services, NDSU Extension Agent, McKenzie McKenzie County Ambulance Services, Public Information Officer
Dam Failure	Sheriff	McKenzie County Public Works Administrator/County Engineer, Emergency Manager, Fire Departments, Public Information Officer
Drought	Emergency Manager	County Health Nurse, NDSU Extension Agent, Social Services, Public Information Officer
Flooding	Public Works Administrator/County Engineer	Emergency Manager, Sheriff, City Public Works, Fire Departments, Public Information Officer
Geologic Hazards	Emergency Manager	None
Hazardous Materials Release	County Fire Departments	Sheriff, Emergency Manager, Public Works Administrator/County Engineer, County Health Nurse, Public Information Officer, Private Industry (responsible party)
Homeland Security	Sheriff	Emergency Manager, County Fire Departments, County Health Department, Social Services, Public Information Officer
Severe Summer Storms	Sheriff	Emergency Manager, County Fire Departments,

Hazard	Lead Agencies	Support Agencies
(Including Tornadoes)		McKenzie County Ambulance Services, Public Works Administrator/County Engineer, City Public Works, Tax Equalization Director, Public Information Officer
Severe Winter Weather	Sheriff	Emergency Manager, County Fire Departments, McKenzie County Ambulance Services, Public Works Administrator/County Engineer, City Public Works, Public Information Officer
Shortage of Critical Materials	Emergency Manager	Sheriff, Social Services, County Health Nurse, NDSU Extension Agent, Public Information Officer
Transportation Accident	Sheriff	Highway Patrol, Public Works Administrator/County Engineer, McKenzie County Ambulance Services, Fire Departments, County Nurse, Emergency Manager, Social Services, Public Information Officer
Urban Fire	City Fire Departments	Sheriff, City Public Works, McKenzie County Ambulance Services, Emergency Manager, Public Information Officer
Wildland Fire	Fire Departments	Sheriff, City Public Works, McKenzie County Ambulance Services, Emergency Manager, County Public Works Administrator/County Engineer, Public Information Officer, (US

Hazard	Lead Agencies	Support Agencies
		Forest Service, ND Forest Service)

8.0 All Hazard Agency Response Duties

There are actions that are taken by emergency response and recovery agencies that are common to all hazards. Section 8 lists those actions that need to be reviewed by response agencies to ensure they are doing what needs to be done.

8.1 BOARD OF COUNTY COMMISSIONERS

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

(Response and Recovery actions are combined because the County Commissioners' actions are combined in both response and recovery.)

- Report to the McKenzie County EOC as required or after notification of the incident
- Receive a briefing of the incident and provide direction to the county officials on the extent of the response and recovery actions
- Issue an Emergency or Disaster Declaration as necessary
- Delegate the authority to locate, procure, and issue resources including equipment, supplies, facilities, and services required by emergency responders and disaster survivors
- Provide direction and control over the use of county resources
- Provide emergency public information through briefings, presentation, news releases, and advisories, websites, social medial postings, and oversight of public inquiry lines
-

8.2 COUNTY EMERGENCY MANAGEMENT

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

- Coordinate warning siren activation, and implementing the Emergency Alert System (EAS) to alert public of situation and of appropriate protective actions.
- Determine the extent of the disaster occurrence county-wide.

- ❑ Notify chief elected official of situation and confer on need for alert and recall of staff.
- ❑ Notify ND Department of Emergency Services (NDDDES) Duty Officer of the disaster occurrence
- ❑ Provide as much detail as possible about the situation and establish ongoing communication to keep DES apprised
- ❑ Upon direction of the chief elected official activate the county Emergency Operations Center (EOC) using established call-up procedures. If there is no EOC activation, go to the Command Post.
- ❑ Initiate appropriate mutual aid compacts
- ❑ Conduct regular briefings of EOC staff on status of the situation if EOC is activated
- ❑ Determine in concert with chief elected official the need to declare a state of emergency
- ❑ Ensure appropriate protective action recommendations are issued via the Emergency Broadcast System (EBS) or other appropriate means
- ❑ Ensure a utility representative is at the EOC or Command Post to coordinate/determine extent and duration of power outages

8.3 EMERGENCY OPERATIONS CENTER PERSONNEL

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

- ❑ Maintain ongoing communications with field command post or forward command post
- ❑ Determine need for evacuation and implement procedures as per appropriate Appendix in the Emergency Operations Plan (EOP)
- ❑ Coordinate and prioritize allocation of resources, such as generators, heavy or specialized equipment, etc.
- ❑ Provide for feeding and billeting of emergency workers
- ❑ Assign/coordinate volunteer workers assignments
- ❑ Work through DES to request and establish liaison with North Dakota National Guard as may be appropriate
- ❑ Identify the need for public information activities
- ❑ Concurrently coordinate opening of shelters
- ❑ Coordinate with law enforcement, the establishment of a pass system for the affected area if the situation warrants

- Establish priorities for restoration of essential services
- Coordinate the restoration and recovery of utilities on a priority basis to key facilities
- Determine need for additional state resources in terms of personnel, equipment, technical assistance
- Initiate the conduct of damage assessment procedures
- Maintain separate records of disaster-related expenditures and apprise all county and local agencies to do likewise
- If appropriate, establish contact with National Weather Service to obtain weather information
- Maintain ongoing communications
- Establish inquiry services for relatives of disaster victims in coordination with County Social Service Department and appropriate volunteer agencies
- Coordinate the management of donations, including early public information releases, which encourage monetary donations in lieu of goods and supplies
- Arrange for emergency generators and lighting
- Arrange for porta-toilets at strategic locations throughout the affected area

8.4 COUNTY LAW ENFORCEMENT

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

- Dispatch law enforcement personnel to assess impact of the disaster
- If first on the scene, establish the incident command system
- Initiate alerting procedures which include notifying law enforcement staff, other appropriate county and local law enforcement agencies and other support services as required
- Notify county emergency management director of situation status and provide periodic updates. Include:
 - Nature of emergency
 - Atmospheric conditions
 - Injuries/fatalities
 - Resources needed
 - Resources committed

- ❑ Prioritize use of personnel and resources to provide for continuity of ongoing day-to-day operations while also responding to the disaster
- ❑ Assist in determining and advise staff of all key operational locations (e.g., county EOC, Joint Public Information Center (JIPIC), field command post, shelter, staging areas, and other key locations.)
- ❑ Dispatch law enforcement coordinator to county EOC if activated.
- ❑ Coordinate the deployment of law enforcement personnel to the affected area to perform such activities as
 - ❑ evacuating and securing the area
 - ❑ participating in search and rescue operations
 - ❑ participating in warning the public as situation warrants
 - ❑ assisting in establishing a joint command post
 - ❑ controlling access to the affected area
 - ❑ controlling traffic
 - ❑ enforcing curfew restrictions in the affected area
 - ❑ establishing emergency communications to the EOC/dispatch center and dispatching communications vehicle to disaster scene
 - ❑ initiating a pass system if necessary
 - ❑ providing disaster assessment information to the EOC/county emergency government director
 - ❑ transporting key public officials
 - ❑ assisting the medical examiner/coroner with mortuary services
 - ❑ maintaining accurate records of disaster-related expenditures
 - ❑ providing security for the EOC
 - ❑ determining the scope of incident as to immediate casualties/destruction and whether the incident has the potential to escalate
 - ❑ advising staff of public information procedures; coordinate with the county/state public information officers if unsure how to proceed
 - ❑ requesting mutual aid if necessary and coordinate deployment
 - ❑ providing for shift change and arrange for feeding of emergency workers
 - ❑ establishing and managing staging areas to provide for strategic positioning and maintenance of emergency vehicles and other equipment
 - ❑ maintaining contact with county/state highway officials regarding road conditions, closures

- As necessary, shelter in-place or evacuate prisoners as may be appropriate from the affected area
- Coordinate the removal of vehicles impeding evacuation or other response activities
- Provide security for emergency responders, equipment and government facilities

8.5 PUBLIC WORKS ADMINISTRATOR/COUNTY ENGINEER

ALL-HAZARDS RESPONSE DUTIES AND RESPONSIBILITIES

- Dispatch public works personnel to determine the extent of the damage
- If first on the scene establish the Incident Command system
- Notify county emergency management director and periodically report on emergency status. Include:
 - Nature of emergency
 - Atmospheric conditions
 - Injuries/fatalities
 - Resources needed
 - Resources committed
- Initiate alerting procedures which include notifying your own staff, other appropriate county and local agencies, external support services and district highway engineer
- Prioritize use of personnel -and resources to provide for continuity of existing services
- Ascertain and advise staff of all key operational locations (EOC, JIC, field command post, shelters, staging areas)
- Dispatch County Public Works Administrator/County Engineer Foreman to EOC if activated and relay any public facility damage information
- Coordinate the deployment of public works personnel to the affected area to perform such activities as:
 - assisting law enforcement in securing area and controlling traffic
 - assisting in urban, search and rescue activities
 - recordkeeping
 - establishing emergency communications to the EOC/dispatch center
 - coordinate with other emergency groups in carrying out evacuation, including maintaining transportation routes
 - transport key public officials, emergency workers, supplies and equipment
 - check inventory to determine resources immediately available
 - request mutual aid if necessary and coordinate deployment

- advise staff of public information procedures then coordinate and report any public information releases to the county public information officer
- Assist utilities in prioritized restoration of services
- Provide for shift change and arrange for feeding of emergency workers. Feeding should be coordinated through the EOC
- Assist private utilities with the shutdown of gas and electric services

8.6 COUNTY PUBLIC HEALTH SERVICES

County Nurse and Upper Missouri District Health Unit

ALL-HAZARDS RESPONSE DUTIES AND RESPONSIBILITIES

- Establish contact with emergency management director and report to EOC if activated
- Initiate alerting procedures which include notifying your own staff, other appropriate county and local agencies and external support services
- Prioritize use of personnel and resources to provide for continuity of existing services
- Initiate mutual aid when necessary
- Brief county emergency management director on emergency status. Include:
 - Nature of emergency
 - Atmospheric conditions
 - Injuries/fatalities
 - Resources needed
 - Resources committed
- Advise staff of key locations then brief and dispatch health/medical personnel as appropriate to address health/medical needs
- Advise staff of public information procedures then coordinate and report any public information releases to the county PIO
- Set up medical shelters as needed
- Set up general population shelters as needed

8.7 EMERGENCY MEDICAL SERVICES

McKenzie County Ambulance, Williston Rural Fire Department, Mandaree Ambulance

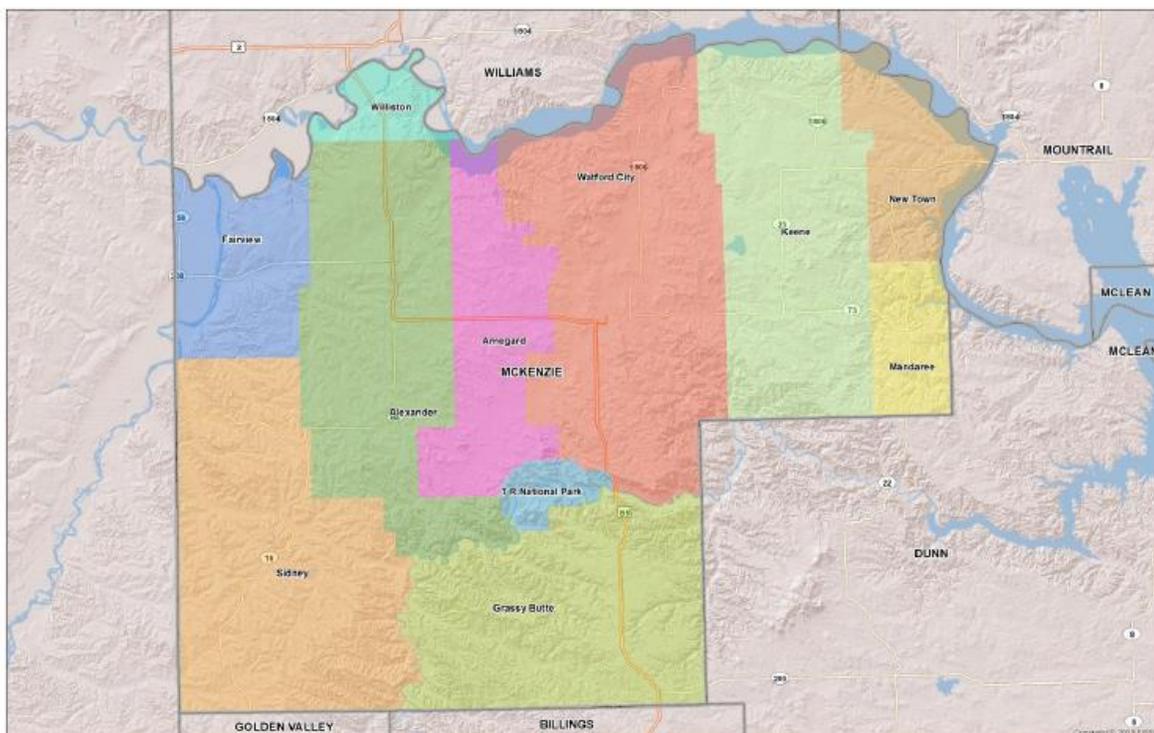

ALL-HAZARDS RESPONSE DUTIES AND RESPONSIBILITIES

- Initiate alerting procedures which include notifying your own staff, other appropriate county and local agencies and external support services
- Prioritize use of personnel and resources to provide for continuity of existing services
- Notify the Upper Missouri District Health Unit of incident to prepare them for possible activation should the situation warrant
- Initiate mutual aid when necessary
- Brief county emergency management director on emergency status.
Include:
 - Nature of emergency
 - Atmospheric conditions
 - Injuries/fatalities
 - Resources needed
 - Resources committed
- Advise staff of key locations then brief and dispatch health/medical personnel as appropriate (e.g., coroner to the scene) to address health/medical needs
- Advise staff of public information procedures then coordinate and report any public information releases to the county PIO to ensure that health questions are answered, local health care providers are notified, appropriate information is released including inquiry service locations, phone numbers and other information is released
- Notify hospitals and other medical facilities to prepare to receive injured
- Coordinate emergency medical care to victims
- Provide for special emergency medical needs of residents in affected area (e.g., special medications, treatments)
- Establish a triage area for victims
- Treat injured and arrange for transport to appropriate health/medical facilities
- Maintain records and compile disaster-related costs
- Assist in evacuating health/medical facilities as needed
- Ensure that emergency medical services are provided to emergency workers

- ❑ Monitor both short and long term health/medical conditions of those affected by the disaster (e.g., by plume, if hazmat incident); monitor identified individuals in affected area
- ❑ Assume responsibility for transport of handicapped and elderly when evacuation is ordered in conjunction with Social Services
- ❑ Coordinate the evacuation of the hospital and nursing home should it become necessary
- ❑ Distribute emergency literature to disaster victims
- ❑ Provide support for rural residences for sewage and septic systems if necessary
- ❑ Provide immunizations to the public if necessary

8.8 COUNTY FIRE SERVICES

Alexander Fire Department, Arnegard Fire Department, Fairview Fire Department, Grassy Butte Fire Department, McKenzie Rural (Keene) Fire Department, Sidney Rural Fire Department, Sioux-Yellowstone Fire Department, Watford City Fire Department, Williston Fire Department

ALL-HAZARDS RESPONSE DUTIES AND RESPONSIBILITIES

- Initiate alerting procedures, including notifying your own staff, other appropriate county and local agencies and external support services
- If first on the scene, establish the incident command system
- Brief county emergency management director on emergency status. Include:
 - Nature of emergency
 - Atmospheric conditions
 - Injuries/fatalities
 - Resources needed
 - Resources committed
- Prioritize use of personnel and equipment to provide for continuity of routine services
- Assist in determining and advise staff of all key operational locations (e.g., EOC, JIC, field command post, shelters, staging areas, and other key facilities)
- Dispatch fire services representatives to EOC if activated
- Assist law enforcement in warning the affected populations
- Coordinate the deployment of fire personnel to the affected area to perform such activities as:
 - firefighting, evacuation, search and rescue
 - maintaining accurate records of disaster-related expenditures
 - providing disaster assessment information to the EOC
 - establishing emergency communications to the EOC or dispatch center
- If a hazardous materials incident, contact State EOC and request a Regional Hazardous Materials Team
- Advise staff of public information procedures. Coordinate and report any public information releases to the county PIO
- Request mutual aid or other additional assistance, if necessary, and coordinate deployment
- Provide for shift change and arrange for feeding of emergency workers. Feeding should be coordinated through the EOC

- Brief county emergency management director on recovery status
- Provide support for rural residences for sewage and septic systems if necessary
- Provide immunizations to the public if necessary

8.9 COUNTY SOCIAL SERVICES ALL-HAZARDS RESPONSE DUTIES AND RESPONSIBILITIES

- Establish contact with emergency management director and report to EOC
- Notify all key staff members to be on standby
- Prioritize use of personnel and equipment to provide for continuity of existing services
- Establish communications with local health agencies, Red Cross and other volunteer agencies
- Establish communications with regional and state human services offices and request assistance, if needed
- Test emergency communications equipment
- Upon notification by emergency management, coordinate with Red Cross and/or Salvation Army in opening and managing shelter operations including:
 - alerting appropriate staff and opening shelters (reference Red Cross/Salvation Army manuals)
 - notifying owners/operators of facilities in which shelter space is to be made available
 - opening reception centers
 - transferring operation of shelters to American Red Cross and/or Salvation Army once they are on-scene
- Assign liaison person to Red Cross Resource Service Center, if established
- Establish inquiry services for relatives of disaster victims in coordination with county social service department and appropriate volunteer agency
- Coordinate with PIO to ensure that appropriate information is released including inquiry service locations, phone numbers and other information is released
- Advise EOC personnel where shelters are located, when shelters are operational, and capabilities and restrictions of each shelter
- Check inventories to determine if needed shelter resources are immediately available

- Based on known disaster information, determine the needs as related to human services including the established number of crisis counselors needed
- Coordinate gathering information on extent of private damages, needs of citizens, and the impact on local human service resources.
- Identify and provide human services for special needs groups, particularly at shelters
- Assume responsibility for transport of handicapped and elderly when evacuation is ordered in conjunction with the County Nurse and Appropriate Hospital
- Contact appropriate state, federal and volunteer agencies to arrange for additional supplies of food and clothing
- Evaluate and determine the need for trained debriefing teams for emergency workers
- Maintain accurate records of disaster-related expenditures
- Evaluate the need to provide care for injured or dislocated individuals including:
 - Family assistance center
 - Family reunification area
 - Food/water
 - Clothing
 - Sanitation
 - Prescriptions
 - Animal welfare (pets)

8.10 COUNTY AUDITOR

ALL-HAZARD RESPONSE/RECOVERY DUTIES AND RESPONSIBILITIES

(Response and Recovery actions are combined because the Auditor's actions are combined in both response and recovery.)

- Upon notification of the incident, report to the EOC and provide EOC staffing of finance and administration as necessary

- Oversee the expenditure of funds and ensure response expenditures are tracked to maximize disaster assistance should it become available
- Maintain accurate records of disaster-related expenditures
- Assist the county emergency manager as necessary
- Keep inventory of county property damaged or destroyed during incident and in post incident activities
- Manage volunteers and the receipt and distribution of donations
- Provide public information through the county PIO

8.10

Alexander PUBLIC SCHOOL, MANDAREE PUBLIC SCHOOL, EAST FAIRVIEW PUBLIC SCHOOL, HORSE CREEK SCHOOL, JOHNSON’S CORNOR CHRISTIAN ACADEMY, WATFORD CITY PUBLIC SCHOOL

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

- Upon notification of the incident, report to the EOC and provide EOC staffing as necessary
- Provide for the safety of the students and plan and coordinate transfer of students to parents or guardians
- Provide the facilities to shelter disaster victims
- Provide transportation of evacuees and/or injured disaster victims
- Provide public information through the county PIO

8.11 NDSU EXTENSION SERVICE, USDA

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

- Upon notification of the incident, report to the EOC and provide EOC staffing as necessary
- Address concerns regarding agricultural functions as well as the effect of the incident upon the natural and cultural resources of the county
- Assessment and surveillance of agriculture needs within the county; provision of agriculture-related services and supplies;

- Identification and application of appropriate agriculture assistance programs
- Obtaining and delivering emergency food supplies
- Responsible for the care and well-being of large animals and livestock
- Provide public information through the county PIO

8.12 CLERK OF COURT and RECORDER

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

- Upon notification of the incident, report to the EOC and provide EOC staffing as necessary
- Provide assistance to the county emergency manager and other EOC officials as necessary
- Provide assistance to the county auditor on volunteer and donations management
- Provide public information through the county PIO

8.13 STATE’S ATTORNEY

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

- Upon notification of the incident, report to the EOC and provide EOC staffing as necessary
- Provide legal advice to the EOC officials as necessary
- Provide public information through the county PIO

8.14 TAX EQUALIZATION DIRECTOR

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

- Upon notification of the incident, report to the EOC and provide EOC staffing as necessary
- Provide damaged/destroyed property values for damage assessment purposes
- Provide assistance to the county emergency manager and other EOC officials as necessary.

- Provide assistance to the county auditor on volunteer and donations management
- Provide public information through the county PIO

8.15 MCKENZIE COUNTY TREASURER

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

(Response and Recovery actions are combined because the Tax Equalization's actions are combined in both response and recovery.)

- Upon notification of the incident, report to the EOC and provide EOC finance and administration staffing as necessary
- Provide assistance to the county emergency manager and other EOC officials as necessary
- Provide assistance to the county auditor on volunteer and donations management
- Provide public information through the county PIO

8.16 MCKENZIE COUNTY VETERANS' SERVICE OFFICER

ALL-HAZARD RESPONSE DUTIES AND RESPONSIBILITIES

- Upon notification of the incident, report to the EOC and provide EOC staffing as necessary
- Provide assistance to the county emergency manager and other EOC officials as necessary
- Provide public information through the county PIO

9.0 All Hazard Agency Recovery Duties

9.1 BOARD OF COUNTY COMMISSIONERS

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- Report to the McKenzie County EOC as required.
- Receive a briefing of the incident and provide direction to the county officials on the extent of the recovery actions
- Delegate the authority to locate, procure, and issue resources including equipment, supplies, facilities, and services required by emergency recovery staff and disaster survivors
- Provide direction and control over the use of county resources
- Provide emergency public information through briefings, presentation, news releases, and advisories, websites, social medial postings, and oversight of public inquiry lines.

9.2 COUNTY EMERGENCY MANAGEMENT

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- Continue staffing of EOC as emergency escalates, then release staff and deactivate EOC as conditions permit
- Coordinate county/local participation in the Preliminary Damage Assessment (PDA) if a Presidential Disaster Declaration is being requested
- If a Presidential Disaster Declaration is received by the county, coordinate with DES in implementing various disaster programs
- If an Individual Assistance Grant is available, ensure the following actions are taken In coordination with the State Individual Assistance Officer, assist in locating a facility for establishment of a Disaster Application Center (DAC): In coordination with the State Public Assistance Officer, make arrangements for facility/is for applicants briefings and ensure that appropriate local officials (potential applicants) attend the briefing
- Coordinate with State Public Assistance Officer in arranging visits of inspection teams to complete damage survey reports for public assistance application
- Coordinate with State Hazard Mitigation Officer in participating in the efforts of the Interagency Hazard Mitigation Team and in conducting briefings on the Hazard Mitigation Grant Program

- ❑ Ensure county health/human service agency/agencies are involved in identifying the need for crisis counseling program both for victims and disaster workers
- ❑ Ensure that procedures are set up to monitor long-term impacts of the disaster
- ❑ Arrange for public information officer to distribute through media information on crisis counseling
- ❑ Continue to monitor volunteer assignments
- ❑ Coordinate and prioritize county/local debris removal operations

9.3 EMERGENCY OPERATIONS CENTER PERSONNEL

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- ❑ Continue restoration of essential services in conjunction with local utilities
- ❑ Request state assistance for debris removal and utility restoration if county/local resources and available mutual aid are inadequate
- ❑ Authorize return of evacuees and begin closing shelters
- ❑ Keep media apprised of progress of recovery effort through regularly scheduled briefings and ensure that public information includes proper repairs and restoration procedures for damaged property and if necessary how to conduct clean up and/or decontamination procedures
- ❑ Continue to coordinate maintenance of accurate records of disaster-related expenditures
- ❑ Gather necessary disaster information to assist the State in documenting requests for federal disaster assistance (e.g., Public Assistance, Individual & Family Grant Program (IFGP), Small Business Administration (SBA), presidential disaster declaration)
- ❑ Determine when organized recovery efforts will terminate; debrief emergency response personnel, conduct after action evaluations and revise emergency plans accordingly

9.4 COUNTY LAW ENFORCEMENT

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- ❑ Ensure continued staffing of EOC and/or field command post as necessary

- ❑ Continue to prioritize use of personnel and equipment to provide for continuity of services
- ❑ Brief county emergency management director on recovery status.
- ❑ Coordinate public information with Joint Information Center (JIC)
- ❑ Continue to provide traffic control and security as situation dictates and/or as re-entry is occurring; phase out pass system as situation allows
- ❑ Assist emergency management director in assessing damages for purpose of completing county-wide Preliminary Disaster Assessment (PDA) submission
- ❑ Continue to compile disaster-related costs, including mutual aid, and keep accurate record of disaster-related expenditures. Submit to county emergency government director to recoup eligible costs in presidentially declared disasters
- ❑ Debrief staff and ensure workers are provided with counseling or that Critical Incident Stress Debriefing occurs
- ❑ Replenish supplies and repair damage to equipment
- ❑ Release personnel as appropriate and phase out mutual aid
- ❑ Recall equipment, vehicles, and personnel to assigned locations
- ❑ If necessary, arrange for decontamination of personnel and equipment and keep precise records of actions taken for each individual worker
- ❑ Assist public health as necessary in arranging for dead animal disposal if quantities indicate.
- ❑ Attend evaluations and revise emergency plans accordingly.

9.5 PUBLIC WORKS ADMINISTRATOR/COUNTY ENGINEER

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- ❑ Ensure continued staffing of EOC and field command post as necessary
- ❑ Prioritize use of personnel and equipment to provide for continuity of existing services
- ❑ Brief county emergency management director on recovery status
- ❑ At the direction of the recovery coordinator, take the following actions:
 - ❑ continue to assist law enforcement in securing the area and in removal of necessary security measures as appropriate
 - ❑ continue prioritizing debris removal

- open and manage per Department of Health regulations predetermined disposal sites
- continue to service temporary utility arrangement (i.e., generators)
- Request and deploy outside assistance to expedite recovery efforts as needed
- Keep Public Information Officer (PIO) advised of recovery efforts
- Assist with transportation and engineering needs for re-entry of evacuated population
- Brief staff and revise plan as necessary
- Release additional personnel as appropriate and phase out mutual aid
- Compile and document disaster-related (to include infrastructure damage figures, public buildings/equipment), maps of damaged areas, and costs and submit to county emergency management director; include mutual aid costs
- Assist county emergency management director in compiling PDA and other damage assessment reports
- Accompany state/federal engineering teams, as assigned by the county emergency management director, and participate in PDA process
- If a presidential disaster is declared, coordinate as assigned with state/federal engineering teams in completing damage survey reports
- Coordinate with human services to identify need for and to provide crisis counseling services to emergency workers
- Replenish supplies and repair damage to equipment.
- Assist public health as necessary in arranging for a sanitarian to be available for questions concerning septic systems and water wells
- Attend evaluations and revise emergency plans accordingly.

9.6 COUNTY PUBLIC HEALTH SERVICES

County Nurse and Upper Missouri District Health Unit

ALL-HAZARDS RECOVERY DUTIES AND RESPONSIBILITIES

- Ensure continued staffing of EOC and/or field command post, as necessary
- Prioritize use of personnel and equipment to provide for continuity of existing services

- ❑ Continue to monitor situation for health/medical related problems (e.g., radiation communicable disease, vector control, need to continue quarantine)
- ❑ Brief county emergency management director on recovery status
- ❑ Keep PIO advised of recovery efforts
- ❑ Continue to inform public about appropriate health/medical related protective actions (e.g., protection against contaminated food/water, disposal of garbage/debris)
- ❑ Cooperate with Red Cross and other agencies in identifying and addressing health/medical related needs
- ❑ Continue to compile and document disaster-related costs and submit to county emergency management director
- ❑ Work with human services to identify need for and provide crisis counseling services to emergency workers and disaster victims
- ❑ Assist with phasing out of shelters and with return of patients/residents to health/medical facilities
- ❑ Release additional personnel as appropriate
- ❑ Replenish supplies and repair damage to equipment
- ❑ Arrange for sanitarian to be available for questions concerning septic systems and water wells through UMDHU
- ❑ Coordinate the testing of potable water as necessary
- ❑ Assist the Sheriff in selecting a site for disposal of dead animals if quantities indicate
- ❑ Debrief staff, participate in evaluations and revise emergency plans accordingly

9.7 EMERGENCY MEDICAL SERVICES
McKenzie County Ambulance, Williston Rural Fire
Department, Mandaree Ambulance

ALL-HAZARDS RECOVERY DUTIES AND RESPONSIBILITIES

- ❑ Ensure continued staffing of EOC and/or field command post, as necessary
- ❑ Prioritize use of personnel and equipment to provide for continuity of existing services

- ❑ Brief county emergency management director on recovery status
- ❑ Keep PIO advised of recovery efforts
- ❑ Continue to compile and document disaster-related costs and submit to county emergency management director
- ❑ Work with human services to identify need for and provide crisis counseling services to emergency workers and disaster victims
- ❑ Assist with phasing out of shelters and with return of patients/residents to health/medical facilities
- ❑ Release additional personnel as appropriate
- ❑ Replenish supplies and repair damage to equipment
- ❑ Provide emergency medical services support for volunteers engaged in cleanup efforts
- ❑ Debrief staff, participate in evaluations and revise emergency plans accordingly
- ❑ Distribute emergency literature to disaster victims

9.8 COUNTY FIRE SERVICES

Alexander Fire Department, Arnegard Fire Department, Fairview Fire Department, Grassy Butte Fire Department, McKenzie Rural (Keene) Fire Department, Sidney Rural Fire Department, Sioux-Yellowstone Fire Department, Watford City Fire Department, Williston Fire Department

ALL-HAZARDS RECOVERY DUTIES AND RESPONSIBILITIES

- ❑ Ensure continued staffing of EOC and field command post, as necessary
- ❑ Prioritize use of personnel and equipment to provide for continuity of existing services
- ❑ Brief county emergency management director on recovery status
- ❑ Keep PIO advised of recovery efforts
- ❑ Assist emergency management director in compiling PDA and other damage assessment reports
- ❑ Continue to compile and document disaster-related costs including mutual aid and submit to county emergency management director
- ❑ Work with human services to identify the need for and arrange crisis counseling services to emergency workers

- Replenish supplies and repair damage to equipment. Restore all equipment to a state of readiness
- Release additional personnel, as appropriate, and phase out mutual aid
- Compile and submit costs related to a hazmat response for billing to the responsible party
- Debrief staff, attend evaluations and revise emergency plans accordingly

9.9 COUNTY SOCIAL SERVICES

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- Ensure continued staffing of EOC and/or field command post, as necessary
- Prioritize use of personnel and equipment to provide for continuity of existing services
- Brief county emergency management director on recovery status
- Keep media advised of recovery efforts. Distribute emergency literature to disaster victims
- Provide necessary outreach and counseling services to citizens affected by emergency or disaster
- Continue to provide Disaster Welfare Inquiry Services per American Red Cross procedures
- If a presidential disaster is declared, provide personnel to work at DAC to assist with administration of various disaster assistance programs such as crisis counseling
- Direct staff to identify potential clients for Crisis Counseling Program and assist State Department of Human Services staff in preparing application to Federal Emergency Management Agency (FEMA) for immediate and long-term programs

9.10 COUNTY AUDITOR

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- Report to the EOC and provide EOC staffing of finance and administration as necessary

- ❑ Oversee the expenditure of funds and ensure response expenditures are tracked to maximize disaster assistance should it become available
- ❑ Maintain accurate records of disaster-related expenditures
- ❑ Assist the county emergency manager as necessary
- ❑ Keep inventory of county property damaged or destroyed during incident and in post incident activities
- ❑ Manage volunteers and the receipt and distribution of donations
- ❑ Provide public information through the county PIO

9.11

Alexander PUBLIC SCHOOL, MANDAREE PUBLIC SCHOOL, EAST FAIRVIEW PUBLIC SCHOOL, HORSE CREEK SCHOOL, JOHNSON'S CORNOR CHRISTIAN ACADEMY, WATFORD CITY PUBLIC SCHOOL

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- ❑ Report to the EOC and provide EOC staffing as necessary
- ❑ Provide for the safety of the students and plan and coordinate transfer of students to parents or guardians
- ❑ Provide the facilities to shelter disaster victims
- ❑ Provide transportation of evacuees and/or injured disaster victims
- ❑ Provide public information through the county PIO

9.12 NDSU EXTENSION SERVICE, USDA

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- ❑ Report to the EOC and provide EOC staffing as necessary
- ❑ Address concerns regarding agricultural functions as well as the effect of the incident upon the natural and cultural resources of the county
- ❑ Assessment and surveillance of agriculture needs within the county; provision of agriculture-related services and supplies;
- ❑ Identification and application of appropriate agriculture assistance programs

- Obtaining and delivering emergency food supplies
- Responsible for the care and well-being of large animals and livestock
- Provide public information through the county PIO

9.13 CLERK OF COURT and RECORDER

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- Report to the EOC and provide EOC staffing as necessary
- Provide assistance to the county emergency manager and other EOC officials as necessary
- Provide assistance to the county auditor on volunteer and donations management
- Provide public information through the county PIO

9.14 STATE'S ATTORNEY

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- Report to the EOC and provide EOC staffing as necessary
- Provide legal advice to the EOC officials as necessary
- Provide public information through the county PIO

9.15 TAX EQUALIZATION DIRECTOR

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- Report to the EOC and provide EOC staffing as necessary
- Provide damaged/destroyed property values for damage assessment purposes
- Provide assistance to the county emergency manager and other EOC officials as necessary.
- Provide assistance to the county auditor on volunteer and donations management
- Provide public information through the county PIO

9.16 MCKENZIE COUNTY TREASURER

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- Report to the EOC and provide EOC finance and administration staffing as necessary
- Provide assistance to the county emergency manager and other EOC officials as necessary
- Provide assistance to the county auditor on volunteer and donations management
- Provide public information through the county PIO

9.17 MCKENZIE COUNTY VETERANS' SERVICE OFFICER

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

- Report to the EOC and provide EOC staffing as necessary
- Provide assistance to the county emergency manager and other EOC officials as necessary
- Provide public information through the county PIO

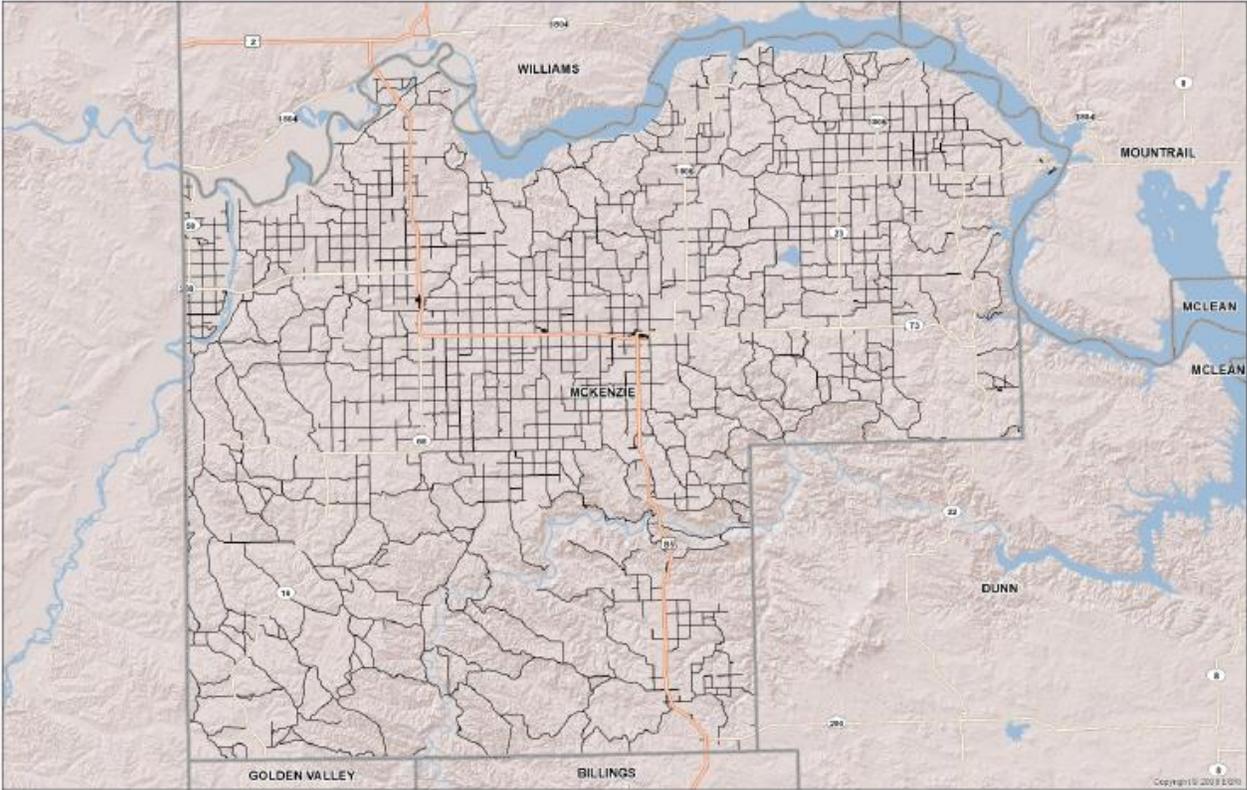

9.18 INCIDENT COMMAND POST

ALL-HAZARD RECOVERY DUTIES AND RESPONSIBILITIES

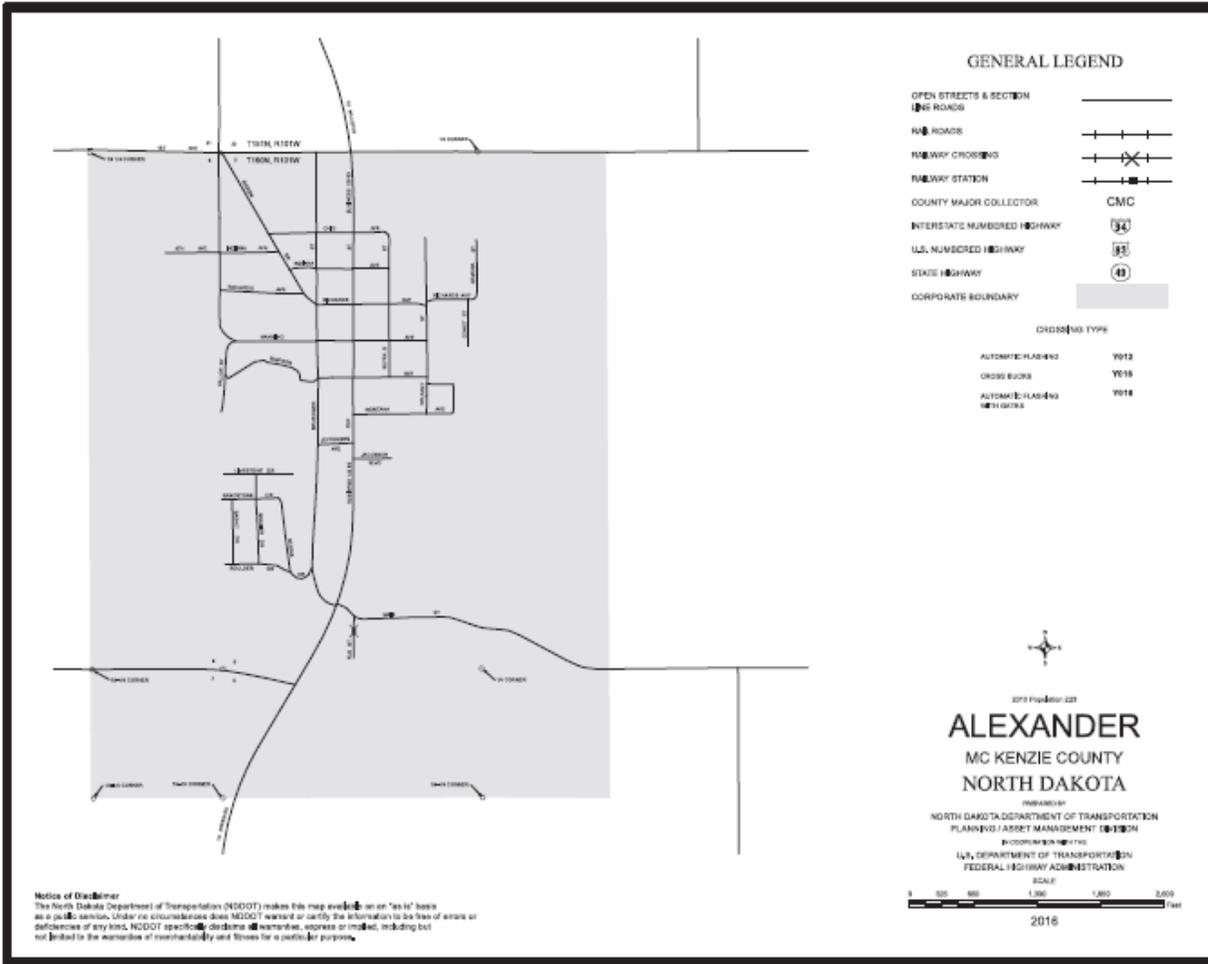

- Replenish supplies and ensure return of all borrowed equipment
- Coordinate clean-up efforts

11.0 Administration

11.1 FEDERAL RESPONSE INTERFACE WITH MCKENZIE COUNTY AND STATE

When an emergency/disaster strikes, the county commission assesses the damage with the assistance of the ESF lead and support agencies. If it is determined a serious incident that is beyond the capability of McKenzie County to recover, the county commission will declare an emergency or disaster which is submitted to the governor through the North Dakota Department of Emergency Services (NDDDES). NDDDES will assess the incident to determine the extent of damage. When NDDDES agrees with McKenzie County officials that the incident is beyond local capability NDDDES advises the governor to declare an emergency/disaster for the affected area of the State of North Dakota. Then an emergency/disaster request is made to the President. DHS/FEMA will conduct a preliminary damage assessment in conjunction with McKenzie County and state officials. If the preliminary damage assessment meets the criteria for a disaster declaration the President will issue a disaster declaration which is followed by the lead federal agency (ies) under the provisions of the National Response Framework (NRF) and the Stafford Act providing recovery assistance. McKenzie County normally cannot be the only county with damages to qualify for federal disaster assistance except under extreme circumstances. Normally many counties have to sustain damages to reach the threshold to receive disaster recovery assistance.

11.2 AGREEMENTS AND UNDERSTANDINGS

Mutual Aid Agreements

Mutual Aid Agreements for general emergency assistance are on file; support may be available through other neighboring counties where these agreements are established. In addition all McKenzie County law enforcement, fire departments and ambulance service have mutual aid agreements on file with their respective counterparts in the jurisdictions surrounding their own. These agreements are on file in the respective departments. Agreements with the American Red Cross are in place for shelter and mass care assistance.

Mutual Aid Agreements should include the following to ensure NIMS compliance:

- ▲ Definition of key terms used in agreements; roles and responsibilities of individual parties
- ▲ Procedures for requesting and providing assistance; procedures, authorities and rules payment; reimbursement and allocation of costs
- ▲ Notification procedures
- ▲ Protocols for interoperable communications
- ▲ Relationships with other agreements among jurisdictions
- ▲ Worker's compensation
- ▲ Treatment of liability and immunity; recognition of qualification and certifications; and sharing agreements, as required.

The following is guidance for developing such agreements:

- ▲ In the event of any flood, fire, tornado or other declared local emergency, (natural or man caused) that cannot be met with the facilities of one of the contracting parties, the other contracting governmental agency agrees, upon request, to furnish aid in coping with such disaster or local emergency to the agency requesting aid upon either an actual or standby basis
- ▲ The extent of aid to be furnished under this agreement shall be determined solely by the governmental agency or department thereof furnishing such aid, and it is understood that the aid so furnished may be recalled at the sole discretion of the furnishing agency
- ▲ Details on how to request mutual aid, the name of a coordinator and designated alternates authorized to send and receive such requests, and the lists of equipment and personnel subject to call will be covered by correspondence between the governmental agencies and the departments annually.
- ▲ Personnel who are furnished will work as far as possible under their own supervisors, and equipment furnished will ordinarily be operated by personnel of the agency furnishing the equipment. General directions relative to work will be given by the appropriate officers of the agency receiving such aid. In the event equipment is sent without operators, strict accountability will be maintained, and the receiving official will be responsible for its supervision and the party receiving aid for its safe return
- ▲ Parties to this agreement may be required to pay compensation to other parties to the agreement for services rendered hereunder. The receiving party may be required to pay all fuel, oil, incidental repairs, and food and lodging for operators
- ▲ Equipment operating under the plan developed by the Associated General Contractors shall be reimbursed as outlined in the existing North Dakota Department of Transportation equipment rental rates (Plan Bulldozer), excluding profit

- ▲ Volunteer personnel must be registered by the sending governmental agency and covered by the worker's compensation insurance of the sending government
- ▲ It is mutually understood and agreed that this agreement does not relieve any of the parties hereto from the necessity and obligation of providing adequate resources within their own areas, and each party hereto agrees that it shall maintain reasonable and prudent diligence in keeping emergency equipment in its possession up to at least minimum standards of repair
- ▲ It is further mutually understood and agreed that the provisions of this agreement will be invoked only when, in the opinion of the city council or county commission, it is deemed necessary to declare an emergency or disaster and to request outside assistance because all of the normal facilities at their command have been exhausted, and outside assistance is needed to control the emergency. If an official suspects the situation may require outside aid, the other parties should be informed immediately so that resources can be put on standby status
- ▲ The agreement shall not be construed as or deemed to be an agreement for the benefit of any third party or parties, and no third party or parties shall have any right of action hereunder for any cause whatsoever
- ▲ Any services performed or expenditures made in connection with furnishing mutual aid under this agreement by either party hereto shall be deemed exclusively to be for the direct protection and benefit of the inhabitants and property of such party
- ▲ Any liabilities incurred as a direct result of support of a receiving government shall be borne by the receiving government
- ▲ Any party to this Mutual Aid Agreement may withdraw at any time, upon 30 days' notice to each of the other parties, and thereafter, such withdrawing party shall no longer be a party to this agreement; but this agreement shall continue in force among the remaining parties

11.3 REPORTS AND RECORDS

In addition to individual intra-agency recording and reporting requirements, all involved organizations will provide emergency management reports in accordance with this Plan, its Annexes and procedures to the emergency manager. This data is used to complete county reports, serve as response record, evaluate the response, and report the incident to the ND Department of Emergency Services.

11.4 EXPENDITURES AND RECORD-KEEPING

Each agency is responsible for establishing the administrative controls necessary to manage the expenditure of funds and to provide reasonable accountability and justification for federal reimbursement if a Presidential Disaster is declared. This should be in accordance with the established federal program guidelines or standard cost accounting procedures, if the latter is acceptable by the reimbursing federal agency.

11.5 CONSUMER PROTECTION

The ND Attorney General's Office through the Bureau of Criminal Affairs may be activated under the State Emergency Operations Plan to monitor emergency activities to provide protection to consumers.

11.6 PROTECTION OF THE ENVIRONMENT

All actions taken pursuant to repair and restoration by a government agency, individual, or private entity will comply with North Dakota and Federal laws, rules and regulations regarding the environment. Additional requirements may be obtained from the North Dakota Health Department.

11.7 NON-DISCRIMINATION

Discrimination against persons on the basis of age, color, economic status, nationality, race, religion, sex, sexual preference or handicap in the administration of emergency services or disaster relief is prohibited. Complaints of discrimination in emergency operations or disaster relief will be made to the McKenzie County emergency management organization for investigation and further action.

11.8 EMERGENCY RESPONDER LIABILITY

Information concerning emergency responder liability within the State of ND is found in the North Dakota Century Code, §37-17.1

12.0 Plan Development and Maintenance

12.1 DEVELOPMENT

Each department/agency with emergency management responsibility is responsible for the development and maintenance of appropriate planning documents that address responsibilities assigned in this Plan including, but not be limited to: SOGs, implementing procedures and/or operational guidelines.

The McKenzie County Emergency Manager will ensure appropriate distribution of the LEOP Plan and any changes thereto. Public access to portions of this Plan may be posted on the McKenzie County website.

12.2 MAINTENANCE

This Plan is a living document and is the principal source of documentation concerning the jurisdictions emergency management activities. Designated departments/agencies of McKenzie County government have the responsibility for developing and maintaining a portion of this Plan. Overall coordination of this process will be performed by the McKenzie County Emergency Manager (EMERGENCY MANAGER) or designee.

- ▲ The emergency manager will authorize and issue changes to this Plan, as necessary and until the Plan is superseded. The Plan will be reviewed annually and be subject to revision annually, unless disasters or other emergencies or other events dictate otherwise.
- ▲ The emergency manager will be responsible for maintenance of this Plan, including revisions, as required. Authorized representatives may recommend changes and will provide information concerning capability changes that affect their emergency management responsibilities. Users, reviewers and other appropriate individuals may also recommend changes. AARs and similar feedback will be considered in the maintenance and update of the Plan.
- ▲ Lead McKenzie County agencies are responsible for participating in the annual review of the Plan. The McKenzie County Emergency Manager will coordinate review and revision efforts, and will ensure that the Plan is updated, as necessary, based on lessons learned during actual events, exercises, as well as changes in organization, technology and/or capabilities.
- ▲ Agencies and organizations have the responsibility for maintaining Annexes, appendices, SOGs, implementing procedures, job aids, notification lists and resource data to ensure prompt and effective response to emergencies. Agency resource data must be accessible to

agency representatives at the McKenzie County EOC. These agencies/organizations are also expected to conduct and/or participate in training activities designed to enhance their ability to accomplish their responsibilities, as assigned by this Plan.

12.3 PLAN EVALUATION

The McKenzie County Emergency Manager will incorporate evaluations of the Plan as applicable. Evaluations will be provided in After Action Reports (AARs) or Improvement Plans (IPs) by ESF Lead and Support Agencies after disasters, emergencies or exercises. These agencies may provide a written evaluation report, which will be provided to the emergency manager for inclusion in the HSEEP report. AARs should entail both written and verbal input from all appropriate participants, including field personnel. An evaluation of the IP or evaluation comments will provide additional opportunity for changes, additions or revisions of the LEOP content.

13.0 Notice of Promulgation

LOCAL EMERGENCY OPERATIONS PLAN

The publication of the McKenzie County Local Emergency Operations Plan represents a concerted effort on the part of the county and city governments to provide a mechanism for effectively responding to and recovering from the impact of natural or human-caused disasters or emergencies.

The stated purpose of this plan and associated supporting documents is to facilitate the delivery of emergency/disaster response, and to provide needed assistance and relief to the citizens and visitors of McKenzie County in the event of an emergency or disaster by county, city, and township governments, community and mutual aid resources. This plan represents the county's best intentions to manage emergencies/disasters within the framework of county-wide cooperation and coordination.

THE MCKENZIE COUNTY EMERGENCY OPERATIONS PLAN IS ADOPTED BY THE MCKENZIE COUNTY BOARD OF COUNTY COMMISSIONERS UNDER RESOLUTION NO. _____. IT SUPERCEDES ALL PREVIOUS PLANS EFFECTIVE ON _____ DAY OF _____, 2018.

Douglas Nordby,
Chairman, Board of County Commissioners
McKenzie County, ND

Erica Johnsrud
Auditor, McKenzie County, ND

Karolin Jappe
Emergency Manager
McKenzie County

These cities, by resolution, hereby adopt the concepts and conditions set forth by the McKenzie County Local Emergency Operations Plan.

Alexander Mayor: _____

Date _____

Arnegard Mayor: _____

Date _____

Watford City Mayor: _____

15.0 Proposal for Changes, Corrections, Additions, and Deletions

Any user of this Plan is encouraged to recommend changes that the user feels may enhance or clarify a particular portion of this Plan. Suggested changes may be made in three ways. First is to have a discussion with the emergency manager to determine the feasibility of the plan change. The second step is to bring the suggested change to an emergency responder meeting such as the Local Emergency Planning Committee (LEPC) meeting. Another method is to complete the following form and submit it to the McKenzie County Emergency Manager at the address below for consideration. The McKenzie County Emergency Manager will respond with a written form as to whether or not the suggestion will be implemented and, if not, why it will not be implemented. The format of the suggested changes should be:

Identify One:

Base Plan ____ Appendix ____ Appendix (No. __) ____

17.0 Roles and Responsibilities

17.1 INDIVIDUALS AND FAMILIES

Individuals and families are responsible for emergency preparedness in all five phases of Emergency Management; prevention, preparedness, response, recovery, and mitigation, not just government agencies and first responders. Keys to staying safe during severe weather or other natural or man-made crisis are communication and preparation. Knowing what to do before, during and after an emergency is a critical part of being prepared. The McKenzie County emergency manager conducts regular campaigns to educate people on severe winter and summer weather events protective measures.

Citizens may do a variety of activities in each phase of emergency management. Some of them are listed below.

- ▲ Prevention
 - Prior to building a home or business study possible building sites to ensure the site safety. Is the site in the flood plain, near a hazardous materials site, or near a dangerous highway or intersection? Follow the building codes to ensure sound building practices.
- ▲ Preparedness
 - Follow these rules: Be Informed, Make a Plan, Build a Kit, Get Involved
 - Develop a family emergency plan
 - Complete a home or business hazard analysis both inside and outside the structure. Make necessary corrections to prepare for damaging conditions such as severe winter weather or severe summer storms
 - Complete appropriate FEMA Independent Study Courses available at www.FEMA.gov
 - Maintain at a supply kit of food, water, medications, and other family specific supplies to last 72 hours
 - Participate in county emergency management exercises such as the severe summer weather exercise conducted each spring.
- ▲ Response
 - Practice your family emergency response plan
- ▲ Follow emergency instructions provided by the "Watch" or "Warning".
- ▲ Recovery

- If an emergency or disaster occurs assess damages and return your home or business to normal. This includes filing eligible insurance claims and or filing for disaster assistance if available.
- ▲ Mitigation
 - Assess your situation. What can you do to mitigate damage to your home or business? Evaluate your home/business and take action to mitigate damages such as improving water drainage around the home or business' exterior.
 - Maintain the home or business to make the structure disaster resilient.

17.2 GOVERNMENT JURISDICTIONS

17.2.1 Board of County Commissioners

McKenzie County is governed by a Board of County Commissioners who has general management of county affairs. The five person Board of County Commissioners are elected at large. County commissioners are elected to four year terms and each commissioner must be a resident of the county. The Board of County Commissioners shall meet and hold regular public meetings for the transaction of business. The Board of County Commissioners:

- ▲ Shall superintend the fiscal affairs of the county.
- ▲ Shall supervise the conduct of the respective county officers.
- ▲ May cause to be audited and verified the accounts of all officers having the custody, management, collection, or disbursement of any moneys belonging to the county or received in their official capacity.
- ▲ Before March fifteenth of each year, shall have the county auditor prepare general purpose financial statements in accordance with generally accepted accounting principles. Public notice that financial statements have been prepared and are available for inspection must be published in the official newspaper.
- ▲ The Board of County Commissioners in an emergency/disaster is McKenzie County's chief executives and is responsible for the public safety and welfare of the people of McKenzie County. The commission has the responsibility to lead the response and recovery phases along with mitigation and prevention responsibilities. Much of the emergency/disaster responsibilities of the County Government are carried out by the Lead and Support Agencies also known as the ESF Agencies.

17.2.2 McKenzie County Sheriff

- ▲ The sheriff's office duties include making arrests, enforcing all state and local laws, maintaining jail facilities, transporting prisoners and mentally ill patients, serving legal papers, holding public sales of property under court orders and attending district court.
- ▲ The McKenzie County Sheriff has the authority to enforce laws in cities and towns as well as rural areas.

17.2.3 McKenzie County Emergency Manager

- ▲ The McKenzie County Emergency Manager shall act on behalf of the elected officials. Responsibilities include oversee and coordinate the McKenzie County-level planning, preparation, exercise, response and mitigation of terrorist threats, natural and human-caused disasters and other emergencies. The Emergency Operations Center (EOC) or alternate EOC may be activated by the emergency manager or the elected officials during an emergency.
- ▲ The McKenzie County Emergency Manager has the responsibility for the development and implementation of emergency management programs designed to provide for rapid and effective response to an emergency situation. They should plan for the protection of life and property within the community. McKenzie County department heads and non-government organizations should work with the emergency manager during the development of local emergency plans and should be prepared to provide response resources.

17.2.4 Township Supervisors

McKenzie County has 30 Townships. Townships have a variety of duties as established by the North Dakota Century Code Chapter 58-01 through 58-18. However the main responsibility Township Supervisors is to carry out is the construction and maintenance of township roads. NDCC Chapter 58-05-02 requires the elected officers of a civil township must be:

1. Three or five supervisors.
2. One township clerk.
3. One assessor except as herein provided.
4. One treasurer.

As an emergency/disaster response agency the Township Supervisors develop plans, participate in trainings, develop internal policies and procedures to meet prevention, preparedness, mitigation, response and recovery needs as identified in the LEOP. Training should be multi-level,

interagency training accompanied by exercises to develop and maintain necessary capabilities.

17.2.5 Cities

The three McKenzie County cities; Alexander, Arnegard, and Watford City; all have the Council form of government.

As an emergency/disaster response agency the Mayor/City Councils develop plans, trainings, internal policies and procedures to meet prevention, preparedness, mitigation, response and recovery needs as identified in the LEOP. Training should be multi-level, interagency training accompanied by exercises to develop and maintain necessary capabilities.

17.2.6 State Government

The North Dakota Department of Emergency Services is the state agency directly supporting McKenzie County government(s) in an emergency/disaster situation. Incidents are reported to the state which in turn distributes the information to appropriate state agencies which may provide needed assistance to local governments. State government also serves as a liaison between local governments and the federal government.

17.2.7 Federal Government

The DHS/FEMA is responsible for the following areas of planning and operations: (e.g., below).

- ▲ Supporting local governments in planning, preparedness, mitigation, response, and recovery operations;
- ▲ Coordinating Federal aid for a Presidentially Declared Disaster (PDD) and emergencies by implementing the NRF;
- ▲ Coordinating emergency preparedness for the possibility of nuclear power plant accidents, radiation accidents, and attack; and,
- ▲ Ensuring continuity of government and coordinating mobilization of resources during national security emergencies.

17.2.7.1 Federal Highway Administration (FHWA)

The Federal Highway Administration (FHWA) provides stewardship over the construction, maintenance and preservation of the Nation's highways, bridges and tunnels. FHWA also conducts research and provides technical assistance to state and local agencies in an effort to improve safety, mobility, and livability, and to encourage innovation.

17.2.7.2 United States Department of Agriculture (USDA)

In the event of a disaster USDA provides assistance to McKenzie County's farmers and ranchers through providing assistance for losses that result from drought, flood, freeze, severe summer weather, pest infestation, and other calamities. USDA provides critical tools and policy and reinsurance agreement information and details the insurance cycle from the application process to the claims process.

17.3 Non-governmental and Volunteer Organizations and the Private Sector

Non-Government Organizations (NGO's) collaborate with other agencies and organizations, first responders and all levels of government to provide relief services to sustain life, reduce physical and emotional distress and promote recovery of disaster victims when assistance is not available from other sources. Private relief organizations have a two-fold responsibility. The first responsibility is to cooperate and coordinate with government agencies to help ensure broad and thorough coverage of relief. The second, and more important responsibility, is to provide relief not provided by the government on a complementary and supplementary basis.

The roles, responsibilities and participation of the private sector vary based on the type and impact of disaster or emergency. Private sector recovery and restoration is a key element of local economies and is essential to aid the jurisdictions impacted.

Certain organizations such as the American Red Cross are required by existing law and regulation to bear the cost of planning and response to disasters or other emergencies, regardless of cause. In the case of a catastrophic incident, these private-sector organizations are expected to mobilize and employ the resources necessary and available, in accordance with their plans, to address the consequences of incidents at their own facilities or emergencies for which they are otherwise responsible.

The roles of private sector organizations may include responding to impacted individuals or Infrastructure, serving as a response resource such as providing shelter management.

18.0 Incident/Hazard Agency Lead and Support Responsibilities by Hazard

Some disasters or emergencies require unique approaches to prevention, preparedness, response, recovery and mitigation at some, or all levels. Section 18 constitutes a collection of materials intended to address specific incidents/hazards. It includes specialized guidance, processes and administration to meet those needs based upon the individual characteristics of the incident.

18.1 Communicable Disease

18.1.1 Human Disease

**Lead – McKenzie County Public Health Nurse
Upper Missouri Valley Health Unit**

**Support – Emergency Manager
Sheriff
McKenzie County Social Services
Public Information Officer
McKenzie County Ambulance Service
NDSU Extension Agent
McKenzie County Healthcare System**

Description

Disease transmission may occur naturally or intentionally, as in the case of bioterrorism, and infect populations rapidly with little notice. There are differences in response to a gradual occurring disease and a rapidly occurring disease. Responders will have to make decisions on how to best respond. New diseases regularly emerge or mutate such as the 2009 emergence of H1N1, 2015 emergence of Ebola and 2016 emergence of the Zika Virus in South and Central America and the possible threat to southern North America.

Bio-Terrorism Diseases

- Anthrax

- Botulism
- Plague
- Smallpox
- Tularemia
- Viral Hemorrhagic Fevers
- Cholera
- Mycotoxins
- Ricin

Natural Occurring Diseases

- Food-borne illnesses, such as E. coli and Salmonella
- Influenza
- Meningitis
- Pertussis/Whooping Cough
- Measles
- Enterovirus D68 (EV-D68)
- Norwalk Virus
- Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS)
- Ebola (shortage of PPE due to JIT Manufacturing)
- H1N1
- Zika Virus
- Hantavirus

Initial Assessment of the communicable disease

- Identify disease and assess **ESF #8-Health & Medical**
 - Determine risk factors for disease and identify susceptible populations
 - Surveillance strategies to identify cases, contacts, and the source and magnitude of the communicable disease emergency
- Determine and implement effective strategies to contain the communicable disease **ESF #8-Health & Medical**
 - Assess possible casualty rate
 - Conduct a damage assessment
 - Assess immunization resource requirements
 - Assess treatment resource requirements

Notification – An event has occurred or is occurring and a response is necessary.

- Notify Emergency Manager, Sheriff, Public Information Officer, and Upper Missouri District Health Unit **ESF #2-Communications & Alerting**
- Notify County Commissioners **ESF #2-Communications & Alerting**
- Notify facilities where people live/work in close proximity and provide advice on disease control methods **ESF #2-Communications & Alerting**
 - McKenzie County Schools (Alexander, East Fairview, Horse Creek School, Johnson's Corner Christian Academy, Watford City)
 - Day Care Centers
 - Notify McKenzie County Ambulance Service
 - Notify NDDDES ESF #5-Emergency Management
- Notify the public through Upper Missouri Valley Health Unit website, the county website, newspapers, local television, radio, and social media **ESF #15-Public Information**
- Provide communicable disease information to responders, clinicians, the public, and other stakeholders **ESF #2-Communications & Alerting,**
- Notify County Commissioners **ESF #2-Communications & Alerting**
- Notify facilities where people live/work in close proximity and provide advice on disease control methods **ESF #2-Communications & Alerting, ESF #15-Public Information**

Warning – If there is potential of an event happening that will impact life and public safety and immediate action is required.

- First responders, community members will be warned by, newspapers, local TV, radio, EAS, and Social Media (Facebook). **ESF #2-Communications & Alerting, ESF #15-Public Information**

Establish Incident Command System

- Identify incident commander **ESF #5-Emergency Management**
- Establish incident command post **ESF #5-Emergency Management**
- Determine ICP Staffing **ESF #5-Emergency Management**
- Determine EOC staffing need and staffing requirements **ESF #5-Emergency Management**
- Establish operational periods **ESF #5-Emergency Management**
- Request IMAT and/or mutual aid support **ESF #5-Emergency Management**

- Request the Civil Support Team (CST) to provide presumptive analysis **ESF #5-Emergency Management**

Immediate Public Safety

- Reduce current and future hazards **ESF #13-Public Safety & Law Enforcement**
- Establish medical services **ESF #8-Health & Medical**
 - Triage
 - Transport
 - Treat
 - Quarantine and/or shelter
- Ensure that the needs of special populations are addressed **ESF #8-Health & Medical**
- Manage and analyze data about the communicable disease emergency and response **ESF #8-Health & Medical**

Property Security

- Establish security for quarantined homes and shelters **ESF #13-Public Safety and Law Enforcement**
- Provide traffic and crowd control **ESF #13-Public Safety and Law Enforcement**
- Remove ongoing hazards to responders or public **ESF #13-Public Safety and Law Enforcement**
- Establish morgue **ESF #8-Health & Medical**

Public Welfare

- Request VOAD support **ESF #14-Volunteer & Donation Management**
- Provide food and medications for quarantined and sheltered individuals **ESF #8-Health & Medical**
- Disseminate public information **ESF #15-Public Information Restoration & Recovery**
- Return systems to normal **ESF #8-Health & Medical**

18.1.2 Plant Disease

Plant diseases, particularly those that infect crops, can distress the agricultural community. Of particular concern in McKenzie County would be those diseases that affect wheat, corn, sunflowers, forage, or barley namely karnal bunt disease of wheat and wheat stem rust-UG00 (Race TTKSK). Plant disease normally will not require a response except by the producer which in most cases will be the application of a fungicide or other chemicals to control the crop disease.

18.1.3 Animal Disease

In McKenzie County, animal diseases that cause most concern are those affecting cattle. They are anthrax and foot and mouth disease. Animal diseases may require a response because the animal disease can spread by people, vehicles, farm machinery, or animal feed. Thus the response actions listed here apply mostly to animal disease.

Lead – Sheriff

Support – Emergency Manager

McKenzie County Extension Agent

Public Information Officer

North Dakota Department Agriculture

**(State Veterinarian possibly including the
Veterinarian Reserve Corps)**

Initial Assessment of the communicable disease

- Identify disease and assess: **ESF #11-Agriculture, Cultural and Natural Resources**
- Determine risk factors for disease and identify susceptible areas **ESF #11-Agriculture, Cultural and Natural Resources**
- Surveillance strategies to identify cases, contacts, and the source and magnitude of the communicable disease emergency **ESF #11-Agriculture, Cultural and Natural Resources**
- Determine and implement effective strategies to contain the communicable disease **ESF #11-Agriculture, Cultural and Natural Resources**

- Assess possible casualty rate **ESF #11-Agriculture, Cultural and Natural Resources**
- Conduct a damage assessment **ESF #11-Agriculture, Cultural and Natural Resources**
- Assess control resource requirements **ESF #11-Agriculture, Cultural and Natural Resources**
- Assess treatment resource requirements **ESF #11-Agriculture, Cultural and Natural Resources**

Notification – An event has occurred or is occurring and a response is necessary.

- Notify Emergency Manager **ESF #2-Communication & Alerting**
 - Notify Sheriff **ESF #2-Communication & Alerting**
 - Notify Public Information Officer **ESF #2-Communication & Alerting**
 - Notify North Dakota Department of Agriculture (State Veterinarian) **ESF #2-Communication & Alerting**
 - Notify McKenzie County Extension Agent **ESF #2-Communication & Alerting**
- Notify County Commissioners **ESF #2-Communication & Alerting**
- Notify farmer/ranchers and provide advice on disease control methods through county website, newspaper, local television, radio and social media **ESF #2-Communication & Alerting, ESF #15-Public Information**
- Notify NDDDES **ESF #5-Emergency Management**
- Provide communicable disease information to responders, clinicians, farmers/ranchers, and other stakeholders **ESF #2-Communication & Alerting, ESF #15-Public Information**

Warning – If there is potential of an event happening that will impact life and public safety and immediate action is required.

- First responders and community members will be warned by newspapers, local TV, radio, and Social Media (Face book). **ESF #2-Communication & Alerting, ESF #15-Public Information**

Establish Incident Command System

- Identify incident commander **ESF #5-Emergency Management**

- Establish incident command post **ESF #5-Emergency Management**
- Determine ICP staffing **ESF #5-Emergency Management**
- Determine EOC staffing need and staffing requirements **ESF #5-Emergency Management**
- Establish operational periods **ESF #5-Emergency Management**
- Request IMAT and/or mutual aid support **ESF #5-Emergency Management**
- Request ND Department of Agriculture Support (State Veterinarian) **ESF #5--Emergency Management**

Property Security

- Determine if it is best to quarantine farms/ranches **ESF #13-Public Safety & Law Enforcement, ESF #11-Agriculture, Cultural and Natural Resources**
- Establish security for quarantined farms/ranches **ESF #13-Public Safety & Law Enforcement**
- Provide traffic and crowd control **ESF #13-Public Safety & Law Enforcement**
- Establish safe method of destroying and disposing of animals **ESF #13-Public Safety & Law Enforcement, ESF #11-Agriculture, Cultural and Natural Resources**

Restoration & Recovery

- Return systems to normal **ESF-#7-Resource Support**

18.2 Dam Failure

Lead – Sheriff
Support – Emergency Manager
Public Works Administrator/County Engineer
Fire Departments
Public Information Officer

Description

Other than the failure of Fort Peck Dam in Montana on the Missouri River, Dam failure is not a big concern for McKenzie County as the dams are located in rural or agricultural areas where there is little possibility of future development. Failure of these dams may result in damage to agricultural

land, township and county roads. No loss of life is expected if the dam fails. The failure of Fort Peck Dam likely will not be a total failure causing the release of all the water from the reservoir. Secondly the flood waters will “stretch out” limiting the flooding in McKenzie County. The impacted area would be at the lowland area where the Yellowstone River meets the Missouri River.

Notification – An event has occurred or is occurring and a response is necessary.

- Notify Sheriff’s Department **ESF #2-Communication & Alerting**
- Notify McKenzie County Public Works Administrator/County Engineer **ESF #2-Communication & Alerting**
- Notify Emergency Manager **ESF #2-Communication & Alerting**
- Notify County Commissioners **ESF #2-Communication & Alerting**
- Notify Fire Departments **ESF #2-Communication & Alerting**
- Notify Public Information Officer **ESF #2-Communication & Alerting**

Initial Scene Assessment

- Scene safety **ESF #13-Public Safety & Law Enforcement**
- Current weather conditions **ESF #13-Public Safety & Law Enforcement**
- Resource requirements **ESF #7-Resource Support**

Warning – If there is potential of an event happening that will impact life and public safety.

- First responders and community members will be warned by NWS, and local TV and radio, EAS, IPAWS, Social Media (Face book), and Ever bridge (Reverse 911).

ESF #13-Public Safety & Law Enforcement

- Update website and social media **ESF #15- Public Information**

Establish Incident Command System

- Identify incident commander **ESF #5-Emergency Management**
- Establish incident command post **ESF #5-Emergency Management**
- Determine ICP staffing **ESF #5-Emergency Management**

- Determine EOC staffing need and staffing requirements **ESF #5-
Emergency Management**
- Establish operational periods **ESF #5-Emergency Management**
- Request IMAT or mutual aid support **ESF #5-Emergency Management**

Immediate Public Safety

- Barricade washed out roads or those that may wash out **ESF #1-
Transportation**
- Remove ongoing hazards to responders or public **ESF #13-Public Safety
& Law Enforcement**

Recovery

- Restore transportation system **ESF #7-Resource Support, ESF #1-
Transportation**

18.3 Drought

Lead – Emergency Manager
Support – Public Information Officer
County Health Nurse
NDSU Extension Agent
Social Services

Description

There is no emergency response to a drought. However there is response to drought impacts such as loss of potable water which is covered in "Shortage of Critical Materials" and the increase in fire probability which is covered in "Wildland Fire".

18.4 Flooding

**Lead – McKenzie County Public Works
Administrator/County Engineer**
Support – Emergency Manager
Sheriff
City Public Works
Fire Departments

Public Information Officer

Description

Historically, the cities and rural areas of McKenzie County are affected by flooding as evidenced by seven Presidential Disaster Declarations between 1969 and 2013. Flooding is caused by rapid snow melt, ice jams, and heavy rainstorms. Cherry Creek has caused flooding in Watford City which may be exasperated by recent commercial development in the southern part of Watford City. The Cartwright area of McKenzie County located at the junction of the Yellowstone and Missouri River. The topography at the junction of the two rivers is low lying flat farmland subject to flooding. During periods of rapid snow melt or heavy rainfall, the Yellowstone River and Missouri River can experience heavy flows causing farmland flooding.

In other parts of the county, the flood issues center on creeks overflowing their banks flooding farm/ranch land and flowing over roads washing them out. Ice jams are also a concern during the spring snow melt period as ice cans can block bridges and culverts causing water to back up.

Warning – There is potential of an event happening that will impact life and public safety.

First responders and community members will be warned by NWS, EAS, Social Media (Face book), and local TV and radio **ESF #13-Public Safety & Enforcement, ESF #2-Communications & Alerting**

Notification – An event has occurred or is occurring and a response is necessary.

Notify Sheriff's Department **ESF #2-Communications & Alerting**

Notify fire departments **ESF #2-Communications & Alerting**

Notify McKenzie County Public Works Administrator/County Engineer **ESF #2-Communications & Alerting**

18.5 Geologic Hazards

- Lead – Road Superintendent/Public Works**
- Support – Emergency Manager**

Description

The identified geologic hazard in McKenzie County is slumping or landslides along the Little Missouri River Badlands which may affect roads.

18.6 Hazardous Materials

- Lead – County Fire Department(s)**
- Support – Sheriff**
- Emergency Manager**
- Public Works Administrator/County Engineer**
- County Health Nurse**
- Public Information Officer**
- Private Industry (responsible party)**
- Emergency Medical Services**

Description

A hazardous material is any substance that has the potential to cause harm to humans, animals, plants, or the environment either by itself or through interaction with other factors. In McKenzie County hazardous materials are found in the energy industry and in agriculture. A hazardous materials release can occur either at a fixed facility or during transportation. McKenzie County has over 5,000 active oil well sites, 2 natural gas processing facilities, several compressor sites, oil field landfills, and 574 farms. There are 33 salt water disposal sites in McKenzie County. Northeastern McKenzie County has an extensive network of pipelines that carry both crude oil and H₂S which pose a hazardous materials release risk. McKenzie County has numerous agricultural chemical supply and storage sites. All of the active oil well sites have hazardous materials and most of the farms have or use hazardous materials.

Warning – There is potential of an event happening that will impact life and public safety.

- First responders will be warned by State Radio, local public safety radio, Social Media (Face book), EAS, IPAWS, Ever bridge, local TV and radio. **ESF #2-Communications & Alerting**

Community members will be warned by and local TV and radio. **ESF #2-Communications & Alerting**

Notification – An event has occurred or is occurring and a response is necessary.

18.7 Homeland Security

Lead – Sheriff
Support – Emergency Manager
County Fire Departments
County Health Department
Social Services
Public Information Officer

Description

A homeland security incident may be caused by a foreign terrorist acting as a single person or small group or it may be a large organization with a planned agenda. A homeland security incident could also be caused by a domestic group or individual with an agenda to change some domestic policy through carrying out a violent or non-violent act at a public or private facility. Regardless of the perpetrator, the intent of causing death, injuries, and/or destruction is the main objective of the terrorist.

The action taken by the terrorist(s) may be an explosive device, gun fire, release of a hazardous material, contamination of a necessary resource including the water supply, or other means of disrupting McKenzie County. The response will vary depending on the type of action of the terrorist(s).

Warning – There is potential of an event happening that will impact life and public safety.

First responders will be warned by State Radio, Local Radio, EAS, IPAWS, and Ever bridge. **ESF 2 – Communications and Alerting**

If deemed appropriate, community members will be warned by NWS, and local TV and radio **ESF 2 – Communications and Alerting**

Notification – An event has occurred or is occurring and a response is necessary.

18.9 Severe Winter Weather

Lead – Sheriff
Support – County Public Works Administrator/County Engineer

City Public Works
Emergency Manager
County Fire Departments
McKenzie County Ambulance Services
Public Information Officer

Description

Severe winter weather may include a variety of conditions including heavy snowfall, a blizzard, extreme cold, cold wind chill, an ice storm, and a combination of these conditions. People of McKenzie County are generally well prepared for severe winter weather conditions but there has been an influx of people from other parts of the USA that are not. When severe winter weather conditions hits, they may be more vulnerable because they do not know what protective actions to take. If conditions are so bad, all the residents may be vulnerable to severe weather conditions.

Warning – There is potential of an event happening that will impact life and public safety.

- First responders will be warned by State Radio Communications and Local Public Safety Radio, **ESF #2-Communications & Alerting**
- Community members will be warned by NWS, Social Media (Face Book), EAS, IPAWS, and Ever bridge, and local TV and radio. **ESF #2-Communications & Alerting**

Notification – An event has occurred or is occurring and a response is necessary.

18.10 Shortage of Critical Materials

Lead –	Emergency Manager
Support –	City Public Works
	County Health Nurse
	Public Information Officer
	Social Services
	NDSU Extension Agent
	Sheriff

Description

A shortage of critical materials may involve a variety of products or services necessary for the health and well-being of McKenzie County citizens. This may include water, food, medicines, heating fuel, gasoline or diesel fuel, and electrical power along with other products or services. An example of a recent shortage of critical materials incident was in 2014 when the Western Area Water Supply pipeline broke shutting off the water supply to the McKenzie County cities. An emergency response was necessary to obtain water for basic needs.

Warning – There is potential of an event happening that will impact life and public safety

First responders and community members will be warned by NWS, EAS, IPAWS, Ever bridge and local TV and radio **ESF #2-Communications & Alerting**

18.11 Transportation Accident

Lead –	Sheriff
Support –	Highway Patrol
	Public Works Administrator/County Engineer
	McKenzie County Ambulance Services
	Fire Departments
	County Health Nurse
	Emergency Manager
	Social Services
	Public Information Officer

Description

Transportation accidents can be of four types, highway, railroad, airplane, and recreational waterways. McKenzie County has 7 miles of railroads operated by BNSF so it is not a large risk for McKenzie County. The most common mode of transportation in McKenzie County is highway thus making it the most common. McKenzie County has one general services airport at Watford City with no passenger services. Highway accidents may be caused by weather conditions, unsafe vehicle operation, and heavy road use beyond the traffic volume the highway was designed for. An accident may or may not involve hazardous materials. If hazardous materials are involved, refer to the Hazard Materials Appendix.

Notification – An event has occurred or is occurring and a response is necessary.

18.12 Urban Fires

Lead – Fire Departments
Support – Sheriff

Public Works
Emergency Manager
Appropriate Ambulance Agency
Public Information Officer

Description

Watford City is the most susceptible city in McKenzie County to urban fire. The other two cities are also vulnerable but not to the extent of Watford City because of their size. If the fire is occurring at a hazardous materials facility, refer to the hazardous materials Annex.

Notification – An event has occurred or is occurring and a response is necessary.

- Notify Sheriff's Department **ESF #2-Communications & Alerting**
- Notify fire departments **ESF #2-Communications & Alerting**
- Notify Appropriate ambulance agency **ESF #2-Communications & Alerting**

- Scene safety **ESF #4-Firefighting**
- Casualties **ESF #8-Health & Medical**

- Current weather conditions **ESF #13-Public Safety & Law Enforcement**
- Damage assessment **ESF #3-Public Works & Engineering**
- Resource requirements **ESF #7-Resource Support**

Establish Incident Command System

- Identify incident commander **ESF #5-Emergency Management**
- Establish incident command post **ESF #5-Emergency Management**
- Determine ICP Staffing **ESF #5-Emergency Management**
- Determine EOC staffing need and staffing requirements **ESF #5-Emergency Management**
- Establish operational periods **ESF #5-Emergency Management**
- Request IMAT or mutual aid support **ESF #5-Emergency Management**

Immediate Public Safety

- Reduce current and future hazards **ESF #3-Public Works & Engineering**
 - Request power turn-off
 - Turn off/on gas/propane
 - Remove debris interfering with response operations
- Evacuate **ESF #13-Public Safety & Law Enforcement**
- Establish medical services **ESF #8-Health & Medical**
 - Triage
 - Transport
 - Treat
- Conduct SAR, account for residents **ESF #9-Search & Rescue**
- Control hazardous materials releases **ESF #10-Hazardous Materials (Haz-Mat) Response**

Property Security

- Establish perimeter security on scene **ESF #13-Public Safety & Law Enforcement**
- Provide traffic and crowd control **ESF #13-Public Safety & Law Enforcement**

- Provide barricades as required **ESF #3-Public Works & Engineering**
- Remove ongoing hazards to responders or public **ESF #3-Public Works & Engineering**
- Provide power generation **ESF #12-Energy**
- Establish morgue **ESF #8-Health & Medical**

Public Welfare

- Request VOAD support **ESF #14-Volunteer & Donation Management**
- Establish shelter **ESF #6-Mass Care, Housing & Human Service**
- Setup temporary sanitation **ESF #8-Health & Medical**
- Provide food and water **ESF #6-Mass Care, Housing & Human Service**
- Establish family assistance center **ESF #6-Mass Care, Housing & Human Service**
- Provide clothing **ESF #6-Mass Care, Housing & Human Service**
- Replace prescription medicines **ESF #8-Health & Medical**
- Disseminate public information **ESF #15-Public Information**

Restoration & Recovery

- Re-establish communications network **ESF #2-Communications & Alerting**
- Restore critical facilities/functions **ESF #8-Health & Medical, ESF #13-Public Safety & Law Enforcement, ESF #5-Emergency Management**
 - Hospital
 - Law Enforcement Center
 - Emergency Operations Center
 - Nursing Home
- Restore utility services **ESF #8-Health & Medical, ESF #3-Public Works & Engineering**
 - Water/Wastewater
 - Electricity
 - Telephone
- Restore transportation system **ESF #1-Transportation**
- Environmental remediation **ESF #8-Health & Medical**

18.13 Wildland Fires

- Lead – Fire Departments**
- Support – Emergency Manager**
- Sheriff**
- McKenzie County Ambulance Services**
- Emergency Manager**
- County Public Works Administrator/County Engineer**
- Public Information Officer**

Description

Wildland fires in McKenzie County refer mainly to the burning of grasslands which may be pastures or CRP, and cropland. The losses may include pastureland and hay land, unharnessed crops, and rural buildings.

Warning – There is potential of an event happening that will impact life and public safety. The public and first responders are warned by the National Weather Service issuing a “Red Flag Warning”.

- First responders will be warned by State Radio and Storm Sentry **ESF #2-Communications & Alerting**
- Community members will be warned by NWS, and local TV and radio. **ESF #2-Communications & Alerting, ESF #15-Public Information**

Notification – An event has occurred or is occurring and a response is necessary.

- Notify Sheriff’s Department **ESF #2-Communications & Alerting**
- Notify fire departments **ESF #2-Communications & Alerting**
- Notify Appropriate ambulance agency **ESF #2-Communications & Alerting**
- Notify Appropriate Hospital **ESF #2-Communications & Alerting**
- Notify McKenzie County Public Works Administrator/County Engineer **ESF #2-Communications & Alerting**
- Notify Emergency Manager **ESF #2-Communications & Alerting**

- Notify hazardous materials facility owners **ESF #2-Communications & Alerting**
- Notify NDDDES **ESF #5-Emergency Management**
- Notify County Commissioners **ESF #2-Communications & Alerting**
- Update website and social media **ESF #15-Public Information**

Initial Assessment of the scene

- Scene safety **ESF #13-Public Safety & Law Enforcement**
- Casualties **ESF #8-Health & Medical**
- Current weather conditions **ESF #13-Public Safety & Law Enforcement**
- Damage assessment **ESF #3-Public Works & Engineering**
- Resource requirements **ESF #7-Resource Support**

Establish Incident Command System

- Identify incident commander **ESF #5-Emergency Management**
- Establish incident command post **ESF #5-Emergency Management**
- Determine ICP Staffing **ESF #5-Emergency Management**
- Determine EOC staffing need and staffing requirements **ESF #5-Emergency Management**
- Establish operational periods **ESF #5-Emergency Management**
- Request IMAT or mutual aid support **ESF #5-Emergency Management**

Immediate Public Safety

- Reduce current and future hazards **ESF #3-Public Works & Engineering,**
ESF #12-Energy
 - Request power turn-off
 - Turn on gas/propane
 - Remove debris interfering with response operations
- Evacuate or shelter in place **ESF #6-Mass Care, Housing & Human Service**
- Establish medical services **ESF #8-Health & Medical**

- Triage
- Transport
- Treat

- Conduct SAR, account for residents **ESF #9-Search & Rescue**
- Control hazardous materials releases **ESF #10-Hazardous Materials (Haz-Mat) Response**

Property Security

- Establish perimeter security on scene **ESF #13-Public Safety & Law Enforcement**
- Provide traffic and crowd control **ESF #13-Public Safety & Law Enforcement**
- Provide barricades as required **ESF #3-Public Works & Engineering**
- Remove ongoing hazards to responders or public **ESF #13-Public Safety & Law Enforcement**
- Provide power generation **ESF #12-Energy**
- Establish morgue **ESF #8-Health & Medical**

Public Welfare

- Request VOAD support **ESF #14-Volunteer & Donations Management**
- Establish shelter **ESF #6-Mass Care, Housing & Human Services**
- Setup temporary sanitation **ESF #8-Health & Medical**
- Provide food and water **ESF #6-Mass Care, Housing & Human**

Services

- Establish family assistance center **ESF #6-Mass Care, Housing & Human Services**
- Provide clothing **ESF #6-Mass Care, Housing & Human Services**
- Replace prescription medicines **ESF #8-Health & Medical**
- Disseminate public information **ESF #15-Public Information**

Restoration & Recovery

- Re-establish communications network **ESF #2-Communications & Alerting**
- Restore critical facilities/functions **ESF #8-Health & Medical, ESF #13-Public Safety & Law Enforcement, ESF #13-Public Safety & Law Enforcement**
 - Hospital
 - Law Enforcement Center
 - Emergency Operations Center
- Restore utility services **ESF #8-Health & Medical, ESF #12-Energy**
 - Water/Wastewater
 - Electricity
 - Telephone
- Restore transportation system **ESF #1-Transportation**
- Environmental remediation **ESF #8-Health & Medical**

19.0 Evacuation and Sheltering

19.1 Purpose

This Annex deals with the movement of people to a safe area, from an area believed to be at risk, when emergency situations necessitate such action. This evacuation and sheltering annex describes the provisions that have been made to ensure the safe and orderly evacuation of people threatened by the hazards McKenzie County and its cities face.

19.2 OBJECTIVES

1. To identify residents, businesses, public buildings and other areas from which occupants and property may need to be evacuated.
2. To locate and identify special concerns of the incident staff to include persons with functional needs, pets, livestock or other property requiring specialized consideration.
3. To identify resources necessary to accomplish an evacuation.
4. To identify the shelter locations for evacuees and the process for caring for their needs.
5. To provide for the timely, safe, orderly evacuation of affected areas as ordered by county and or city officials and or the Incident Commander.
6. Provide for prompt information dissemination to the affected area.
7. Provide for prompt return of all displaced citizens.
8. Incident Specific Objectives, e.g. Recognize, Avoid, Isolate, and Notify (RAIN) if hazardous materials are a recognized threat:

A. _____

B. _____

C. _____

D. _____

SCOPE OF AUTHORITY

In North Dakota, authority for evacuating persons from a threat is prescribed by state law as listed below:

19.3 Evacuation Authority of the Governor

- The North Dakota Disaster Act of 1985, [North Dakota Century Code Chapter \(NDCC\) 37-17.1](#)
- During the state of emergency or disaster the governor has the authority to direct and compel (that is forcibly remove) the evacuation of all or part of the population from any stricken or threatened area within the state if the action is necessary for the preservation of life or other disaster mitigation, response or recovery.

19.4 Evacuation and Sheltering Authority of County Commissioners and Mayors

- All county commissioners and mayors have the authority to direct, but not to compel, evacuation within their jurisdiction in the event of a disaster emergency. The authority of county and municipal elected officials may be exercised after a local disaster or emergency has been declared by the county or municipal governing body upon finding that a disaster has occurred or is imminent.
- In the event of the need for sheltering, the Chief Elected Official will delegate authority to the Social Services representative, based upon a recommendation to shelter by the Incident Commander. The Shelter Supervisor, likely a representative from American Red Cross, Social Services or a School Superintendent (dependent of the Red Cross Shelter Models), will then be directed to activate shelters.

19.5 Evacuation Authorization

1. **DELEGATION OF AUTHORITY.** Before implementing this plan, if the area of concern is outside the jurisdictional authority of the designated Incident Commander, the affected jurisdiction(s) Chief Elected Official,

e.g. mayor or county commissioner, must delegate decision-making and implementation authority.

2. **AUTHORITY:** Authority for evacuation during this incident is based on the following references:
 - a. **Legal Authority:** [North Dakota Century Code Chapter \(NDCC\) 37-17.1](#)
 - b. **Disaster Plan:** McKenzie County, Local Emergency Operations Plan
3. **RESPONSIBILITY:** The agency responsible for planning, implementing, and managing an evacuation during this incident is identified as the Incident Commander.
4. **INCIDENT COMMANDER's written evacuation statement:**

"I have determined the nature of this emergency may pose significant threat to the health and safety of persons within the area, added/revised objectives per the threat and revised/edited/inpuffed the implementation plan.

The affected Chief Elected Official(s) is/are requested to review the attached plan, initiate necessary proclamations or declarations, and grant extraordinary authority for me to implement elements of the evacuation plan as conditions warrant.

OR

The nature of this emergency does not permit prior authorization of evacuation through normal channels. I order the immediate implementation of evacuation efforts as noted in the attached plan.

OR

The evacuation was ordered during the Initial Attack of this incident and the attached plan documents the decisions for that action.

SIGNATURE and TITLE of INCIDENT COMMANDER

DATE and TIME"

5. **CHIEF ELECTED OFFICIAL(S) written evacuation statement:**

"As the official(s) having legal responsibility for the approval of evacuations within this jurisdiction:

a. *The Incident Evacuation Plan has been reviewed, necessary proclamations or declarations have been completed, and the Incident Commander is hereby granted authority to implement elements of the plan as conditions warrant.*

OR

b. *The Incident Evacuation Plan has been reviewed, and it is my/our decision to withhold approval of the Incident Commander's request for authority to implement elements of the plan. The basis for this decision is attached. This decision may be reviewed and amended as conditions warrant.*

OR

c. *I/we have been advised of the Incident Commander's use of extraordinary authority to proceed with evacuation. The basis for that decision has been reviewed and I/we do do not authorize continued evacuation efforts.*

SIGNATURE and TITLE

DATE and TIME"

19.6 Situation and Assumptions

Typical are assumptions that:

- The annex focuses on hazards that provide sufficient warning time to implement a planned evacuation for people identified as being at risk in the jurisdiction.
- Spontaneous evacuation will occur when there is sufficient warning of the threat. Between 5 and 20 percent of the people at risk will evacuate before being directed to do so.
- Some people will refuse to evacuate, regardless of the threat.
- Some owners of companion animals will refuse to evacuate unless arrangements have been made to care for their animals.
- Roughly 5-10 percent of the population at risk will require shelter in a mass care facility. Many evacuees will seek shelter with relatives, friends, or motels rather than use government-provided mass care facilities.
- Where available, military support (as approved by the Governor) may be available to support evacuation efforts.
- Evacuation of people at risk for emergency situations that occur with little or no warning will be implemented on an *ad hoc* basis. The individual responsible for implementing it should be the Incident Commander at the scene of the emergency, with support arranged through the EOC as necessary.

- Evacuation instructions should be based on known or assumed health risks associated with the hazard.

19.7 Concept of Operations

There are several factors which must be considered when planning for an evacuation. Among these are the characteristics of the hazard or threat itself. The magnitude, intensity, speed of onset, duration, and impact on the local community, are all significant elements to be considered. They will determine the number of people to be evacuated, time available in which to effect the evacuation, and the time and distance of travel necessary to insure safety. Evacuees are moved from their homes to a designated area within the jurisdiction (or a neighboring jurisdiction in some cases) not impacted by the hazard that caused the evacuation.

19.8 Hazard Specific Threats to Health and Safety

19.8.1 Hazardous Materials Fixed Facilities:

Fixed facilities are listed in the Tier II Report files at the Emergency Management Office.

19.8.2 Hazardous Materials Transportation

Transportation accidents involving a carrier transporting hazardous materials can occur anywhere in McKenzie County. As an example if a highway accident occurs with hazardous materials being transported, a breach on the hazardous materials container may require a whole town to evacuate or a significant portion of a rural area.

Watford City has a general aviation airports from which crop sprayers may use as an operational base, storing various types of crop pesticides and herbicides.

McKenzie County is served by US Highway 85 which enters southeastern McKenzie County south of Grassy Butte, runs north to Watford City, runs west to Alexander and then north to Williams County west of Williston. ND Highway 200 makes a short run in McKenzie County off of US Highway 85 south of Grassy Butte running east into Dunn County. ND Highway 16 enters southwest McKenzie County and parallels the State Line ending at ND Highway 68. ND Highway 68 enters McKenzie County east of Sydney, Mt., runs east and north connecting to US Highway 85 south of Alexander. ND Highway 1806 runs north of Watford City to Tobacco Gardens Bay of Lake Sakakawea. A smaller stretch of ND Highway 1806 runs south of Carlson

connecting to ND Highway 23. ND Highway 23 runs west of New Town and south to ND Highway 73. ND Highway 22 enters the county south of Mandaree and runs north connecting to ND highway 23. ND Highway 200 goes west of US Highway 85 to Fairview. ND Highway 58 goes from ND Highway 200 to Trenton. There are numerous County and Township roads in McKenzie County

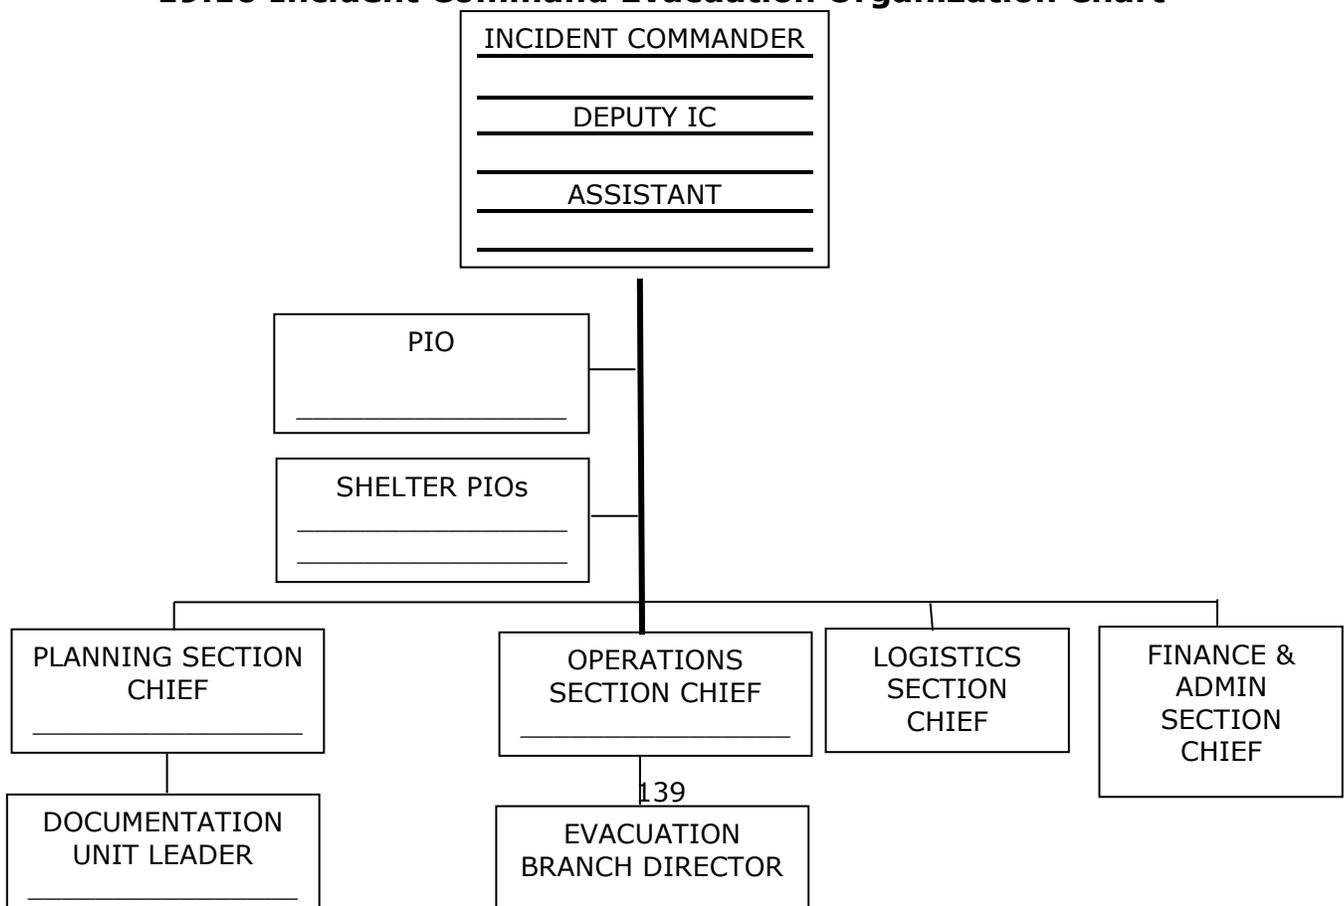

19.8.3 Weather Related Events

Severe summer storms may be the cause of an evacuation when a tornado destroys the housing in a city and the people have no place to go. The population may be forced to shelter in a neighboring town or in a safe building in their town. Winter storms may cause the loss of power to a city whereby people are required to seek shelter in a community shelter where electricity and heat are provided by generators.

19.9 Evacuation Implementation

The process of evacuating people from their communities is very complicated. First of all there must be eminent danger to the population to require an evacuation. Secondly the evacuation must be planned by individuals who understand their community; the population, hazards, and resources. Thirdly, officials managing the evacuation must use the Incident Command System to carry out an organized evacuation response.

19.10 Incident Command Evacuation Organization Chart

19.11 Incident Command System Positions Defined

Evacuation Branch Director

**[Resource Order to be filled by _____
Political sub-division with jurisdiction]**

An Evacuation Branch Director (EBD) is needed when evacuation is **probable** or people are in **immediate danger** and the Incident Commander does not have sufficient resources to effect necessary actions below. The EBD reports to the Operations Section Chief (OSC) when one is assigned to the incident, otherwise to the Incident Commander (IC). The EBD is primarily responsible for preparing and/or revising this evacuation plan, managing any evacuation effort associated with the incident, and coordinating evacuation efforts between the various agencies that may be involved.

When an evacuation is eminent, the evacuation branch will meet at the following staging areas:

1. Alexander, City Hall/Fire Hall
2. Arnegard, City Hall
3. Watford City, Civic Center

Duties include those of all needed subordinate positions not filled and:

- Obtain initial and daily briefings from OSC or IC; understand “Concept of Operation” at page 124 and Special Needs Demographics page 146.
- Determine and understand local jurisdiction and responsible state agency authorities for conducting an evacuation as a result of this incident (see page 122) and Obstruction Response Procedure page 145).
- Review position descriptions on following pages, evaluate need for additional Evacuation Branch resources and order accordingly:
 - Alert – concentrate on Contact Group.
 - Warning – concentrate on Contact and Perimeter Groups and Shelter Group Supervisor.
 - Evacuation – review all Branch resource needs.
- When the IC issues an evacuation warning or directive:

1. Begin shelter preparations or establishment by coordinating with the local Disaster Coordinator, Rob Stotz of the Mid-Dakota Chapter, American Red Cross (ARC) Phone (701) 500-2402 **to open _____ in the _____ community**, or other pre-designated shelter in the _____, ND area. (See Pages 36-38)

2. Coordinate **to establish livestock and pet holding areas** as required.

- Establish an evacuee briefing site(s) at the designated shelter. Provide site locations(s) to Information Officer, Perimeter Group Supervisor and Contact Group Supervisor.
- Inform Incident Communications Unit and/or Resource Unit of all status changes of resources assigned to the Branch.
- Revise this evacuation plan as necessary.
- Coordinate Branch activities with Divisions and other Branches.
- Know daily planning cycle and participate with Incident Planning Section Chief (PSC) in the development of daily Incident Action Plans, unless urgency of evacuation situation precludes it.
- Coordinate with PSC or Documentation Unit Leader to understand incident documentation requirements.
- Attend daily Operations Briefing.
- Review work assignments with Group Supervisors daily, usually immediately after the daily Operations Briefing.
- Approve and turn in time reports of Group Supervisors.
- Ensure subordinates are aware of reporting and documentation requirements and comply.
- Complete a Unit Log (ICS Form 214 <https://training.fema.gov/icsresource/icsforms.aspx>) daily and submit it as directed by the OSC or IC.

Contact Group Supervisor

**[Resource Order(s) to be filled by _____
Political sub-division with jurisdiction]**

A Contact Group Supervisor (CGS) is needed when evacuation is **possible, probable** or people are in **immediate danger** and Incident Commander (IC) does not have sufficient resources to effect necessary actions below. The CGS reports to the Evacuation Branch Director (EBD) when one is assigned to the incident, otherwise to the Operations Section Chief (OSC) or lastly, the IC. The CGS is responsible for ensuring people in the

evacuation area are informed of the current danger level, what shelters have been activated and/or shelter in place procedures. The CGS coordinates with the Public Information Officer (PIO) and manages assigned contact teams to inform people using any combination of: posting information bulletins in locations specified by PIO, telephone calls, and direct, house-to-house contact. Duties include those of all needed subordinate positions not filled and:

- Obtain initial and daily briefings from EBD, OSC or IC; understand "Concept of Operation" at pages 124.
- Review Contact Team descriptions (see page 131) and order any additional resources needed.
- Determine if McKenzie County Social Services has updated evacuation Area Resident Contacts & Phone Numbers list. Provide updates to Phone Contact Team Leader.
- Obtain from XXXXXXXXXX, (Agency Representative) and provide to each assigned Mobile Field Contact Team, maps that depict all known residences in the area teams are to cover.
- Determine maximum possible number of residences in affected area and order from local fire departments, appropriate quantities of signage/door hangers for Alert, Warning, and Evacuation phases; provide an adequate supply of the appropriate signage/door hanger cards to each assigned Mobile Field Contact Team with instructions on their use.
- Develop notification message appropriate to current situation in conjunction with EBD and provide to Contact Team Leaders with appropriate directions.

Alert – advise people in affected area of the situation and recommend they take precautions to "Protect in Place".

Warning – recommend that persons requiring extraordinary care, transportable property, pets, and livestock (if feasible) be moved from affected area, and that residents continue to "Protect in Place". Identify briefing site(s) established by EBD.

Evacuation – direct occupants of the affected area(s) to leave within a specified time period, by pre-designated route(s), and report to briefing site(s) established by EBD. Warn those refusing to cooperate with the Evacuation directive as follows:

"If you choose to stay and defend your property, you do so at your own risk. You may incur personal liability for any interference with emergency personnel. Emergency personnel may not be available to assist you."

Contact Teams should report to the Perimeter Group Supervisor by the fastest possible means, any person(s) who appears to be incapable of making a reasonable and informed decision due to their physical or mental condition, or is otherwise unable to comply with the evacuation directive.

- Provide adequate supplies of Pre-evacuation Contact Data sheets to all Contact Teams.
- Collect completed Pre-evacuation Contact Data sheets from all Contact Teams daily and process according to incident documentation procedures.
- Inform EBD or Incident Communications and/or Resource Unit of all status changes of resources assigned to the Group.
- Review assignments daily with all Group resources.
- Approve and turn in time for all resources assigned to the Group.
- Complete a Unit Log (ICS Form 214 <https://training.fema.gov/icsresource/icsforms.aspx>) daily and submit it as directed by EBD, OSC or IC. Inform supervisor of hazardous situations, significant events and resource status.
- Implement "Text Telephone" sometimes known as TTY for the hearing impaired.

Contact Teams

Phone Contact Team

A Phone Contact Team is needed when evacuation is **possible, probable** or people are in **immediate danger** and Incident Commander wants to make phone notifications but does not have sufficient resources. The phone notification situation dictates the number of team members. They report to a working Team Leader who reports to the Contact Group Supervisor (CGS). Team members make phone notifications as instructed in writing by the CGS, to area residents listed by the Incident Management Team (IMT) Planning Section. That list will be provided to and may be obtained from McKenzie County Social Services. Supplies and equipment required for each team member include:

- An operable telephone,
- A chair or bench,
- Table space,
- Simple, written instructions accompanying a notification message,
- A list of names and numbers to call,
- A supply of Pre-evacuation Contact Data sheets (see p. 47; used in Alert and Warning phases),
- A ball point pen (and spares) to track contacts.

Mobile Field Contact Teams

Mobile Field Contact Teams are needed when evacuation is **possible, probable** or people are in **immediate danger** and Incident Commander wants to make field notifications but lacks sufficient resources. Each 2-person team has a driver and a Team Leader. The number of people in the evacuation area dictates the number of teams. They report to the Contact Group Supervisor (CGS). Teams visit all known, accessible residences in the evacuation area and notify residents as directed by the CGS. Supplies and equipment required for each team includes:

- A map identifying all known residences in coverage area,
- A vehicle appropriately equipped to travel the intended routes,
- A public address phone and speaker,
- A radio that can transmit and receive on a frequency also available to the Perimeter Group Supervisor,
- Simple, written instructions with the notification message,
- A supply of Pre-evacuation Contact Data sheets (see p. 47; used in Alert and Warning phases),
- A supply of Alert Phase signage "Protect In Place" used in **Alert phase only**,
- A supply of Warning Phase signage "Evacuation" used in **Warning phase only**, and
- A ball point pen (and spares) to complete special instructions on "Evacuation" signage and track contacts.

Designated markings are posted by the Mobile Field Contact Teams. Closure signs are posted at the perimeter as needed and door signage is posted on homes using the following color code:

Description of Action	How Distinguished
Resident/Occupant has been personally contacted.	Orange
Occupant has a condition that requires extraordinary care.	Yellow
Hazardous materials identified on property.	Blue
Occupant request assistance moving property	Green
Non-Emergency vehicle permitted within perimeter	Red

Perimeter Group Supervisor

[Resource Order(s) filled by the law enforcement authorities with jurisdiction.]

A Perimeter Group Supervisor (PGS) is needed when evacuation is **probable** or people are in **immediate danger**. The PGS reports to the Evacuation Branch Director (EBD) when assigned, otherwise to the Operations Section Chief (OSC), lastly to the Incident Commander (IC). The PGS is responsible for locating and securing perimeters, establishing and staffing traffic control points, and securing any property, pets and/or livestock holding areas designated by the EBD. The PGS must also see that any person(s) who appears to be incapable of making a reasonable and informed decision or is otherwise unable to comply with an evacuation directive relayed by Mobile Field Contact Teams, is escorted out of the evacuation area. Duties include those of all needed subordinate positions not filled and:

- Obtain initial and daily briefings from the EBD, OSC or IC; understand "Concept of Operation".
- Review Security Team descriptions and order any additional resources needed.
- Ensure reliable communications with Mobile Field Contact Teams. Ensure a response to any Mobile Field Contact Team report of any person(s) who appears to be incapable of making a reasonable and informed decision due to their physical or mental condition, or is otherwise unable to comply with the evacuation directive. Be prepared to have individual(s) escorted from evacuation area. Ensure an Evacuation Order Report (see page 123) is completed in each instance. Ensure the OSC and IC are aware of the Evacuation Order as soon as possible.
- Secure evacuated residential areas and property and animal holding area(s) as needed.
- Establish checkpoints, roadblocks or road closures as needed to control the situation.
- Coordinate with PIO to ensure information disseminated at control points is accurate.
- Ensure reasonably reliable communications between control points.
- Provide Roadblock Traffic Control Teams with Roadblock Data sheets and instructions on their use.
- Collect Roadblock Data sheets and Evacuation Order Reports from Security Teams daily and process according to incident procedures.
- Coordinate with Karolin Jappe, Jerry Samuelson Local Jurisdiction to establish a Personal Property Holding Area and secure same. Inform EBD, Contact Group Supervisor and PIO.

- Ensure the North Dakota Department of Human Services, (Children and Family Services) (701) 328-2316, or the nearest local office is aware of any unaccompanied minors escorted to shelters.
- Inform EBD or Incident Communications and/or Resource Unit of all status changes of resources assigned to the Group.
- Review assignments daily with all Group resources.
- Approve and turn in time for all resources assigned to the Group.
- Complete a Unit Log (ICS Form 214 <https://training.fema.gov/icsresource/icsforms.aspx>) daily and submit it as directed by EBD, OSC or IC. Inform supervisor of hazardous situations, significant events and resource status.

SECURITY TEAMS

Evacuation Escort Team

An Evacuation Escort Team is needed when evacuation is **probable** or people are in **immediate danger**. And IC may be faced with a need for peace officers to escort people from evacuation area. Evacuation situation dictates number of team members needed. They report to a working Team Leader who reports to Perimeter Group Supervisor (PGS). Two team members respond to each Mobile Field Contact Team or other report of any person(s) in the evacuation area: who appears to be incapable of making a reasonable and informed decision due to their physical or mental condition, or is otherwise unable to comply with an evacuation directive, or any minor(s) unaccompanied by a parent or guardian. Teams must be prepared to escort individual(s) from evacuation area. Provide security to persons returning to their homes. They must complete a written Evacuation Order Report (see p. 46) for each occurrence and report the occurrence to the PGS by the fastest means available. Unaccompanied minors must be escorted to a shelter and the escort must contact the North Dakota Department of Human Services, (Children and Family Services) (701) 328-2316, **Toll Free:** (800) CHILDREN [(800) 245-3736] or the nearest local office. Supplies and equipment required for each team member include:

- A map identifying the Incident Command Post (ICP) and all known residences in the area the team is to cover,
- A vehicle appropriately equipped to travel the area,
- A public address phone and speaker,
- A radio that can transmit and receive on a frequency also available to Team Leader and PGS,
- A supply of Evacuation Order Reports (see p. 46), and
- A ball point pen (and spares) to write reports.

Property Security Team

A Property Security Team is needed when evacuation is **probable** or people are in **immediate danger** and the IC needs to secure real or personal property or animals belonging to those evacuated, but lacks sufficient resources. The number of personal property, animal holding or residential areas dictates the number of team members. Provide assistance and security to people returning to their homes. They report to a Property Security Team Leader who reports to the PGS. Supplies and equipment required for each team member includes:

- A map identifying the area a team member is to cover and the ICP,
- A vehicle appropriately equipped to travel to and from the area, and
- A radio that can transmit and receive on a frequency also available to both Team Leader and PGS.

Mobile property holding area(s):

1. Alexander -
2. Arnegard -
3. Watford City -

Traffic Control Team

A Traffic Control Team is needed when evacuation is **probable** or people are in **immediate danger** and IC requires checkpoints, roadblocks or road closures to control the situation, but lacks sufficient resources. Number of needed control points dictates number of team members. Team members report to a Traffic Control Team Leader who reports to PGS. Team Leader and PGS will determine staffing required at each control point. Supplies and equipment required at each control point include:

- A map for each control point identifying both it and the ICP,
- A vehicle appropriately equipped to travel to and from the point,
- Accurate, current, situational information of interest to the public, and
- A radio that can transmit and receive on a frequency also available to both Team Leader and PGS.
- Roadblock Traffic Control Teams also require Roadblock Datasheets (p. 48) and instructions on their use.

TRAFFIC CONTROL DEVICES: (Specify Type and Quantity)

- A. Signs: _____
- B. Barricades/cones/pylons: TBD – Plan for (8) Street Barricades – If Needed.
- C. Lights: TBD – Plan for Illumination of (4) Intersections
 - 1. Warning: _____
 - 2. Illumination: _____

Public Information Officer

A Public Information Officer (PIO) is necessary as part of the Command Staff and at each operational shelter. The ARC will provide a PIO for Model 1, Red Cross Shelters. As part of the Command Staff, the locally identified PIO will be actively engaged in each phase of the evacuation and sheltering operation. It is critical that the local PIO be actively involved in public awareness campaigns during Phase 1, Prevention, Mitigation and Preparedness, (see Attachment A, Shelter In Place brochure).

Types of Communication:

- Emergency Alert System – warning tones, crawl messages, cable TV override, NOAA Weather Radio
 - Oral Communications – interviews, telephone conversations, briefings, public service announcements, speeches
 - Print Communications – press releases, fax, email, public notices, and fact sheets.
- Social Media

Name: xxxxx Secondary xxxxx

Date and Time for Media Briefings:	TBD

Shelter Group Supervisor

[Resource Order to be filled by the _____ Chapter of the American Red Cross chapter with disaster and sheltering operations jurisdiction.] Or Other Local Volunteer Organizations

A Shelter Group Supervisor (SGS) is needed when evacuation is **probable** or people are in **immediate danger** and shelter planning or shelters are needed. The SGS reports to the Evacuation Branch Director (EBD) when assigned, otherwise to the Operations Section Chief (OSC), lastly to the Incident Commander (IC). The SGS is responsible for opening and overseeing management of shelters in areas designated by the EBD (see pages 36-37). Duties include those of all needed subordinate positions not filled and:

- Obtain initial and daily briefings from the EBD, OSC or IC; understand "Concept of Operation".
- Meet immediate needs (to include medical) of persons requiring extraordinary care.
- Review ARC Shelter Management standing operating procedures and order needed resources.
- See to the cultural and religious needs of persons at the shelter through the Ministerial Association.
- Coordinate if necessary, with American Red Cross, Salvation Army, Church or other volunteer groups to ensure that adequate, safe shelters capable of feeding nutritionally adequate meals, providing first aid, and tracking and bedding down occupants, are open to evacuees when needed.
- Coordinate with Command Staff PIO to ensure assignment of an Information Officer to each shelter. Ensure shelter occupants are continually informed of the incident situation and control efforts.
- Be able to identify all unattended minors at the shelter.
- Ensure that relatives/guardians of shelter occupants can locate them.
- Inform EBD or Incident Communications and/or Resource Unit of all status changes of resources assigned to the Group.
- Review assignments daily with all Group resources.
- Approve and turn in time for all resources assigned to the Group.
- Complete a Unit Log (ICS Form 214, <https://training.fema.gov/icsresource/icsforms.aspx>) daily and submit

it as directed by EBD, OSC or IC. Inform supervisor of hazardous situations, significant events and resource status.

Note: Currently the Shelter Group Supervisors are the superintendents of the Alexander, Mandaree, and Watford City Public Schools; the Ministers of Alexander Trinity Lutheran Church, and Keene Clear Creek Church; and the Watford City Civic Center manager. This arrangement will probably change pending an agreement between the ARC and the school superintendents and ministers and the Watford Civic Center manager. It is anticipated that they will select Model Number One at which time the ARC will control every aspect of sheltering services. Currently, the Red Cross has an agreement with the schools in McKenzie County.

Animal Shelter Coordinator

An Animal Shelter Coordinator (ASC) is needed when evacuation is **probable** or people are in **immediate danger** and animal shelter planning or shelters are needed. The ASC reports to the Evacuation Branch Director (EBD) when assigned, otherwise to the Operations Section Chief (OSC), lastly to the Incident Commander (IC). The ASC is responsible for opening and overseeing management of shelters in areas designated by the EBD. Duties include those of all needed subordinate positions not filled and:

- Obtain initial and daily briefings from the EBD, OSC or IC; understand "Concept of Operation" at pages 8-13.
- Meet immediate needs of animals requiring extraordinary care.
- Review Animal Shelter Management standing operating procedures and order needed resources.

- Coordinate if necessary, with local veterinary services to ensure that adequate, safe shelters capable of feeding nutritionally adequate meals, providing first aid, and tracking and bedding down evacuated animals as needed.
- Coordinate with Command Staff PIO.
- Ensure that animal owners can locate their animals.
- Inform EBD or Incident Communications and/or Resource Unit of all status changes of resources assigned to the shelter.
- Review assignments daily with all shelter resources.
- Approve and turn in time for all resources assigned to the shelter.
- Complete a Unit Log (ICS Form 214 <https://training.fema.gov/icsresource/icsforms.aspx>) daily and submit it as directed by EBD, OSC or IC. Inform supervisor of hazardous situations, significant events and resource status.

Finance and Administrative Section Chief

- As soon as possible, in collaboration with other General Staff Section Chiefs conduct an early assessment of essentially needed mutual aid assistance. Review mutual aid agreements in place (see county LEOP).
- If needed mutual aid agreements are not in place – conduct the necessary coordination to secure the needed assistance.

Evacuation Cost May Include:

- Transportation cost for evacuees
- Equipment and Supplies
- Rent for Evacuation Centers
- Food
- Water
- Other (Describe)

Evacuation Phases

Evacuation actions are divided into three phases: Phase 1-Prevention, Mitigation, and Preparedness; Phase 2, Response; and Phase 3-Recovery.

Phase 1 – Prevention, Mitigation and Preparedness –

The focus during this phase is pre-planning. What needs to be done in advance of an incident? The importance of participating in severe weather campaigns by focusing on evacuation, shelter in place, sheltering, and mass care. Make preparations to use the media to the maximum extent, employ the local PIO, and exercise the protocols for issuing press releases (same as would be done with a burn ban).

Note: The Lead Agency Representative within Unified Command will be incident dependent, example: a hazardous material requiring an evacuation will be the Fire Department; an incident requiring sheltering would be Social Services.

Sheriff's Department

- Develop evacuation SOGs
- Participate in evacuation and sheltering planning, training, and exercises.

Fire Department

- Develop evacuation SOGs.
- Participate in evacuation and sheltering planning, training, and exercises.

Public Health

- Develop evacuation and sheltering SOGs.
- Participate in evacuation and sheltering planning, training, and exercises.

Alexander, Arnegard, Watford City (See Contact List)

- Test Emergency Warning System (Siren)

McKenzie County Extension

- Coordinate with for evacuation procedures for agricultural animals and pets.

County Road Superintendent

- Develop evacuation SOGs.
- Obtain necessary traffic control signs to supply evacuation routes.
- When flooding is possible, monitor all potential evacuation routes to assure availability. This includes State Highways.
- Participate in evacuation and sheltering planning, training, and exercises.

Ambulance

- Develop evacuation SOGs.
- Establish number of patients hospitals could receive.
- Coordinate with area EMS / rescue squads ambulances available to support evacuation of hospital / nursing homes if required.
- Participate in evacuation and sheltering planning, training, and exercises.

Social Services

- Maintain relationship with area organizations serving special needs populations .
- Provide evacuation information to clients as supplement to warning system.
- Participate in evacuation and sheltering planning, training, and exercises.
- Review sheltering SOPs.

School Superintendents

- Participate in evacuation and sheltering planning, training, and exercises.

- Review sheltering SOGs.

Phase 2 – Response

Sheriff's Department

- Assume command with authority from North Dakota Century Code 12.1-25-04 and initiate evacuations during civil unrest, criminal activities, or bomb threats.
- As command, give message to be broadcast on the Emergency Alert System.
- Establish or help rural fire department and Public Health establish isolation, evacuation, sheltering zones and evacuation priorities.
- Plan and manage evacuation routes.
- Document evacuation progress to avoid gaps or duplications.
- Plan and manage over all traffic control.
- Establish a press briefing area when Sheriff's Department is lead agency or have a representative at the press briefing area when another agency in the lead.
- Plan and manage assembly areas for those without vehicles.
- Identify evacuation teams to do street by street or house by house evacuations.
- Organize and direct security in zones throughout the incident.
- Notify and coordinate with county extension service for locations of and direction for the evacuation of animals.
- Obtain contact information (Social Services) and provide evacuation transportation for functional needs residents

Fire Department

- Assume command and initiate evacuation with authority from The International Rural Fire Code 104.11 (as adopted by the State of North Dakota) during rural fires, hazardous materials incidents, explosions, aircraft crashes, and industrial accidents.
- As command, give a Public Address Announcement to be broadcast on the Emergency Alert System.
- As command, instruct State Radio to initiate county callback.
- Assumes evacuation support role during major flooding, civil unrest, criminal activities, bio-terrorist incidents, or bomb threats.
- Establish or help Sheriff's and Public Health establish isolation, evacuation, sheltering zones and evacuation priorities.
- Establish a press briefing area when rural fire department is lead agency or have a representative at the press briefing area when another agency in the lead.
- Perform search, rescue and evacuation in the immediate vicinity of the incident.

- Determine or assist Sheriff's Department and Public Health in determining if evacuation or sheltering zone is safe for re-entry.

Public Health

- Assume command and initiate evacuations during bio-terrorism events or biological outbreaks with authority from North Dakota Century Code 23-35-08.
- As command, give message to be broadcast on the Emergency Alert System.
- As command, initiate staff callback.
- Establish or help Sheriff's Department and rural fire department establish isolation, evacuation, sheltering zones and evacuation priorities.
- Inform sector EMS of priorities.
- Establish a press briefing area when Public Health is lead agency or have a representative at the press briefing area when another agency in the lead.
- Assist rural fire department and Sheriff's Department with evacuation or sheltering decisions concerning institutional facilities.
- Notify institutional facilities with evacuation or sheltering decisions and assist with planning.
- Notify hospitals outside evacuation area.
- Determine or assist rural fire and Sheriff's departments in determining if evacuation or sheltering zone is safe for re-entry.
- Provide technical assistance to shelter operators with public health-related issues.
- Coordinate mental health services with Social Services.

McKenzie County Extension

- Coordinate evacuation of agricultural animals and pets.

State Radio

- Alert / call back dispatchers & support staff as needed.
- Ensure critical communications capabilities and supplemental emergency communications.
- Activate McKenzie County Warning procedures.

Road Superintendent

- Assist with barricades and signs for traffic control and security.
- Establish detour routes when needed.
- Provide priority service to evacuation routes.
- Provide a representative to the press briefing area when requested.
- Assist with heavy equipment as necessary.

- Assist with establishing evacuation and sheltering zones, especially during flooding.
- Assist with planning evacuation routes.
- Monitor traffic flow on evacuation routes to divert traffic from bottlenecks.

Ambulance

- Coordinate medical evacuation requirements with Incident Command / EOC
- Establish medical triage at incident scene.
- Coordinate incident scene decontamination procedures with fire department.
- Communicate and coordinate with local hospitals for treatment.

Volunteer Coordinator (Church Groups, Red Cross etc.)

- Coordinate volunteer services as requested by IC/ EOC
- Perform shelter operations management in accordance with the American Red Cross shelter modeling.

Citizen Emergency Response Team (CERT) (If /When Established & Trained)

- Provide basic disaster response services at scene

Social Services

- Coordinate/assist with sheltering.
- Coordinate mental health services with Public Health.

School Superintendents

- Coordinate/assist with sheltering.

19.12 OPERATIONAL PHASES (DURING THE RESPONSE): Any of three operational phases may be employed at any time as dictated by the situation. They are described below.

- A. **EVACUATION ALERT** – Incident Commander (IC) recognizes **possibility** of need to evacuate. People in affected area must be alerted. IC should review Contact and Perimeter Group tasks on pages 131-132 and immediately task Operations Section to limit access and accurately track non-IMT personnel admitted to, or residing in affected area. IC should evaluate need for additional resources to alert the public. Resources to consider:
- Type 1, Public Information Officer (PIO),
 - Contact Group Supervisor (see page 131),
 - Phone Contact Team (see page 132), and
 - Mobile Field Contact Teams (see page 133).

IC orders needed resources pursuant to Delegation of Authority. IC alerts affected people using assigned resources until ordered resources arrive.

B. EVACUATION WARNING – IC recognizes **probability** of need to evacuate. Warn people in affected area. IC should evaluate need for additional resources to warn the public and prepare to evacuate the area. Resources to consider:

- Type 1, Public Information Officer (PIO),
- Evacuation Branch Director (see page 144),
- Contact Group (as identified in paragraph A, above),
- Perimeter Group Supervisor (see page 132),
- Security Teams (see page 133),
- Shelter Group Supervisor (see p. 134), and
- Documentation Unit Leader.

IC orders needed resources pursuant to Delegation of Authority. IC warns affected people with assigned resources until ordered resources arrive.

C. EVACUATION DIRECTIVE – IC recognizes people in affected area are in **immediate danger** and must be evacuated! IC should immediately order additional resources to evacuate and shelter people and pets and begin evacuating the affected area with assigned resources. In addition to resources identified in paragraph B above, IC should also order at least one shelter be opened.

1. **VOLUNTARY EVACUATION** – A voluntary evacuation directive will be issued when conditions exist that present a moderate risk to life or as “advance warning” to allow citizens sufficient time to make preparations to evacuate if conditions suggest a mandatory evacuation may be imminent.
2. **MANDATORY EVACUATION** - A mandatory, large scale evacuation directive will be issued when conditions exist that present a significant risk to life. In this case, the use of (or threat of) physical force to accomplish mandatory evacuation will not be used. It is assumed that local government will not be able to prevent loss of life after a mandatory evacuation advisory is issued and not heeded by those affected.

D. EMERGENCY IMPLEMENTATION PROCEDURE: In the event an evacuation is directed a door to door notification is preferred. However, if

time does not permit personal notification of affected people, the following procedure will be utilized:

Local radio and television stations, local PSAP, local NWS outlets (Bismarck, and Williston) and Reverse 911 (where available).

E. OBSTRUCTION RESPONSE PROCEDURE: The recommended response for persons refusing to cooperate with an evacuation directive is: By order of the Governor of North Dakota, through the North Dakota Highway Patrol (Lead Functional Authority) to local Law Enforcement, persons refusing will be compelled to cooperate.

F. Traffic Plan

Routes and Destinations:

Primary Route: Out of Town Evacuation	Alexander to Arnegard, US Highway 85
	Alexander to Watford City, US Highway 85
	Arnegard to Alexander, US Highway 85
	Arnegard to Watford City, US Highway 85
	Watford City to Alexander, US Highway 85
	Alexander to Arnegard, US Highway 85
	Keene to Watford City, ND Highway 23
	Grassy Butte to Watford City, US Highway 85
	Grassy Butte to Killdeer, US Highway 85 and ND Highway 200
	Mandaree to Watford City, ND Highway 22, ND Highway 73, ND Highway 23
	Mandaree to New Town, ND Highway 22, ND Highway 23
In-Town Evacuation	Alexander – Trinity Lutheran Church Arnegard – Lutheran Church Watford City – Watford City Public School and/or Watford City Civic Center Keene –Clear Creek Church

Primary Destination:	If safe (Incident Dependant)
	Alexander
	Arnegard

	Watford City
	Keene
	Mandaree
	Grassy Butte
Alternate Route:	Incident Dependant – “Remember for HazMat – Stay Uphill, Upstream, Upwind”
	If US 85 is compromised, use
	If ND Highway 22 is compromised use
	If ND Highway 23 is compromised use
	If ND Highway 73 is compromised use
Alternate Destination:	Alexander
	Arnegard
	Watford City
	Keene
	Grassy Butte
	Mandaree

G. Special Needs Population Transportation Resources

The special needs population includes those individuals who are not able to transport themselves. This includes children in school, children in day care centers; the handicapped (hearing-impaired, sight-impaired, mentally impaired, and mobility-impaired); non-English speaking people; incarcerated residents in jails, transient populations (street people, motel and hotel guests, seasonal workers); and people without transportation.

It is impossible to provide accurately the number of special needs populations. However, the following table provides an estimate of the numbers of selected population categories that may need assistance with transportation out of the evacuated area.

US Census Bureau, 2015-2016 estimates		
Population Category	Percent of Population	Disability Population
<5 Years of Age	9.9%	1,249
<18 Years of Age	31%	3,913
>65 Years of Age	7.8%	984
Foreign Born	.8%	101

Language other than English	5.1%	644
<65 Years of Age with a disability	6.3%	795

People without their own means of transportation need assistance evacuating to a safe area. School buses will be used to transport people during an evacuation. The available buses include:

Alexander School (XX) School Buses – Total Passengers = XX
 Watford City School (XX) School Buses – Total Passengers = XX

People without transportation or in need of transportation assistance will be directed to meet at their evacuation assembly area described below.

- Evacuation Assembly Area/Areas:
 - Alexander – City Hall/Fire Hall
 - Arnegard – City Hall
 - Watford City – Civic Center
 -

Handicapped individuals unable to get to the pickup point are encouraged to register with the “Disability Registry” that is kept at the ND Department of Emergency Services (ND DES). Local officials can access this registry by contacting ND DES to get the names and addresses of those individuals.

Incarcerated individuals will be transported to a neighboring jurisdiction (Williston or Dickinson) by the Sheriff’s Office.

19.12 Traffic Control

During a rapid evacuation, highways may become congested with traffic resulting in unsafe conditions for the evacuees. Traffic control is necessary with the type of control outlined in this table.

Location	Type of Control
Alexander to Arnegard, US Highway 85	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars
Alexander to Watford City, US Highway 85	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars

Arnegard to Alexander, US Highway 85	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars
Arnegard to Watford City, US Highway 85	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars
Watford City to Alexander, US Highway 85	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars
Alexander to Arnegard, US Highway 85	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars
Keene to Watford City, ND Highway 23	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars
Grassy Butte to Watford City, US Highway 85	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars
Grassy Butte to Killdeer, US Highway 85 and ND Highway 200	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars
Mandaree to Watford City, ND Highway 22, ND Highway 73, ND Highway 23	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars
Mandaree to New Town, ND Highway 22, ND Highway 23	<input checked="" type="checkbox"/> Mobile Patrols <input type="checkbox"/> Traffic Directional Control <input type="checkbox"/> Pilot Cars

19.13 EVACUATION SHELTERS:

Shelter Name/Phone Number	Location	Responsible Agency	Shelter Manager
Trinity Lutheran Church	Alexander		
Lutheran Church	Arnegard		
Watford City Public School	Watford City		
Watford City Civic Center	Watford City		
Clear Creek Church	Keene		

Public Information Officers will be assigned to shelters as follows:

Shelter Name	Information Officer	Contact Numbers
Trinity Lutheran Church		
Lutheran Church		
Watford City Public School		
Watford City Civic Center		
Clear Creek Church		

19.14 Animal Shelter Locations

Provisions must be made to house animals which may be household pets or livestock evacuated from a farm. The following table outlines animal shelter areas.

Responsible Local Official – County Extension Agent		
Facility Name	Address	Phone No.
McKenzie County Fairgrounds		

19.15 Recovery

The responsibility of local agencies are outlined below.

Sheriff’s Department

- Determine or assist rural fire department and Public Health in determining if evacuation or sheltering zone is safe for re-entry.
- Regulate safe re-entry.
- Critique LE operations and update plan with changes required.
- Complete reports as required.
- Determine ability of evacuees to return safely.
- Establish traffic control for return of evacuees.
- Assist with return of special needs groups as required.

Health Department

- Critique Health operations and update plan with changes required.

- Complete reports as required.

Fire Department

- Critique Fire operations and update plan with changes required.
- Complete reports as required.
- Determine ability of evacuees to return safely.
- Assist with return of special needs groups as required.

Highway Superintendent

- Assist Sheriff's Department in planning safe re-entry.
- Recover barricades and signs.

19.15.1 RETURN TO EVACUATED AREA: IC will rescind Evacuation Directive for all safe areas as soon as practicable. The PIO will inform evacuees and the public in general. Evacuees will be allowed to return to safe areas. Evacuation Branch Director will coordinate with IC or Plans Section Chief (PSC) to develop and execute an Evacuation Branch Demobilization Plan. Shelter Group Supervisor will evaluate hardships and special needs and initiate required action in accordance with American Red Cross standing operating procedures, prior to demobilizing. The Emergency Operations Center (EOC) is the coordinating entity (in concert w/public health) for health and safety considerations e.g. mold control and local utility company/garbage pickup coordination.

19.15.2 TRANSITION HOUSING: If after three days of shelter living it is not possible for people to return to their homes, accommodations will be made for transition housing. Media outlets, VOAD organizations, and social and foster care services will be mobilized to identify locally available accommodations, e.g. private homes and motels, etc. The Finance and Administration Section Chief will secure contract arrangements with local motels and private home owners. If it appears that long-term sheltering will be needed, the local Emergency Operations Center Manager will coordinate through NDDDES for longer term transition housing, e.g. FEMA trailers.

19.16 Organization and Assignment of Responsibilities

Chief Executive Official ("CEO") (Chair of County Commission or Mayor)

- Requires the evacuation coordinator to report to the EOC when notified of an emergency situation.

- Issues a statement on the jurisdiction's policy on people that do not comply with evacuation. The statement addresses the consequences for not evacuating and the services (food, medical, utilities, sanitation, etc.) that will be discontinued or interrupted in the evacuation area.
- Issues evacuation instructions or an evacuation order when appropriate.

Evacuation Coordinator

Upon arrival at the EOC:

- Reviews known information about the emergency situation and make recommendations to the Emergency Manager on the appropriate evacuation options to implement.
- Determines any scene(s) where IC(s) may have already evacuated. If so, identifies perimeters and verify extent of abandonment.
- Identifies assembly areas for picking up people that do not have their own transportation.
- Identifies evacuation routes.
 - Estimates the traffic capacity of each designated evacuation route.
 - Selects evacuation routes from risk area to designated mass care facilities.
 - Examines access to evacuation routes from each part of the risk area.
 - Prepares the evacuation movement control plan.
 - Coordinates with law enforcement officials.
 - Assists, as appropriate, the animal care and control agency's efforts to
 - Evacuate animals at risk during catastrophic emergency situations.

Emergency Manager

- Makes recommendations to the "CEO" on the appropriate evacuation option to implement.
- Ensures that functional coordinators are clear on location of mass care facilities outside of the risk area that will be used to house evacuees.
- Coordinates with and assist the animal care and control agency staff to identify facilities that may be used to house evacuated animals.

Law Enforcement

- Provides traffic control during evacuation operations. Operational considerations include:

- Route assignment departure scheduling.
- Road capacity expansion.
- Entry control for outbound routes.
- Perimeter control on inbound routes.
- Traffic flow, including dealing with breakdowns.
- Establishment of rest areas.
- Secures, protects, and houses those prisoners that must be evacuated.
- Assists in the evacuation of the risk area, as necessary.
- Protects property in the evacuated area.
- Limits access to the evacuated area.
- Coordinates with the Evacuation Coordinator.

Public Works

- Verifies the structural safety of routes (roads, bridges, railways, waterways, airstrips, etc.) that will be used to evacuate people.

Public Information Officer (PIO)

- Disseminates the following types of instructional materials and information to evacuees:
 - Identification of the specific area(s) to be evacuated.
 - List of items that evacuees should take with them (such as food, water, medicines, portable radio, fresh batteries, clothing, sleeping bags).
 - Departure times.
 - Pick-up points for people requiring transportation.
 - Evacuation routes. (Give easy to understand instructions using major roads, streets, highways, rivers, etc.)
 - Location of mass care facilities outside of the evacuation area.
- Keeps evacuees and the general public informed on evacuation activities and the specific actions they should take.

Mass Care Coordinator

- Disseminates information on appropriate actions to protect and care for companion and farm animals that are to be evacuated or left behind.
- Activates staff and opens mass care facilities outside the evacuation area when directed to do so by appropriate authority.

Health and Medical Coordinator

- Ensures patient population is reduced in hospitals, nursing homes, and other health care facilities, if evacuation becomes necessary.
- Ensures transport and medical care are provided for the patients being evacuated.
- Ensures continued medical care is provided for patients who cannot be moved when hospitals, nursing homes, and other health care facilities are evacuated.

School Superintendent

- Evacuates students from school buildings when the situation warrants or when directed to do so by appropriate authority.
- Closes school facilities and releases students from school when directed to do so by appropriate authority.
- Coordinates, where appropriate, the use of school buses/drivers to support the overall evacuation effort.

Animal Care and Control Agency

- Based on information from the Evacuation Coordinator on the high hazard areas in the jurisdiction, makes an initial estimate of the numbers and types of animals that may need to be evacuated.
- Coordinates with the Evacuation Coordinator to arrange travel routes and schedules the timing for evacuation of farm animals, animals in kennels, veterinary hospitals, zoos, pet stores, animal shelters, university laboratories, etc. and wildlife (as appropriate) from the risk area.
- As appropriate, mobilizes transportation vehicles (stock trailers, trucks equipped with animal cages, etc.) that may be used to evacuate the animals.

All Tasked Organizations

- Implements evacuation by sending evacuation team(s) to load and transport the animals being evacuated.
- As appropriate, dispatches search and rescue teams to look for animals left behind by their owners, stray animals, and others needing transport to a safe location.
- Make provisions to protect and secure facilities and equipment not taken out of the area to be evacuated.
- Identify and make provisions to relocate the organizational equipment and supplies that will be moved from the evacuation area.

Administration and Logistics

This section addresses the administrative and general support requirements for the evacuation function.

Administration

Specific areas to be addressed include:

- Records and reports associated with tracking the status (evacuation notices, number evacuated, number of evacuees in mass care facilities, etc.) of evacuation events.
- Attaching Appendix 1 that contains maps that depict the routes that have been designated as primary and alternate evacuation routes.

Logistics

Specific areas to be addressed include:

- The provisions that have been made to move from the area being evacuated those essential supplies and equipment items that are needed to sustain operations and to meet the needs of evacuees. Typical items include:
 - Food.
 - Water and water trailers.
 - Medical supplies.
 - Food, carriers, leashes, etc. for animals.
 - Sanitation devices.
 - Portable generators and lighting devices.
 - Gas and diesel fuel.
 - Public works equipment and vehicles such as bulldozers, graders, dump trucks, snowplows, etc.,
 - Police and fire fighting vehicles, etc.Mutual aid agreements with neighboring jurisdictions that address the support (law enforcement personnel, vehicles to transport evacuees, mass care staff and facilities to shelter evacuees, etc.) to be provided by the jurisdictions to facilitate evacuation operations.
- This section should identify who is responsible for coordinating revision of the jurisdiction's Evacuation Annex, keeping its attachments current, and ensuring that SOPs and other necessary implementing documents are developed.

17.3 SITUATION DOCUMENTATION AND MANAGEMENT SOFTWARE

WebEOC is used by McKenzie County to report all significant incidents to the State Emergency Operations Center Staff. WebEOC is also used to monitor state and regional events to provide intelligence on the event and its potential impact on McKenzie County. WebEOC also serves as a permanent record of McKenzie County Emergency and Disaster events.

Preservation of Records

The preservation of important records and the taking of measures to ensure continued operations and, if necessary, reconstitution of local government during and after catastrophic disasters or national security emergencies is the responsibility of the executives of each jurisdiction. Records to be preserved should include, at a minimum:

- ▲ Records protecting the rights of individuals include marriage licenses and divorce papers, property and land titles, tax statements and licenses, and records required by health, fire, law enforcement and public works to conduct emergency operations.
- ▲ Records required to re-establish normal government functions and to protect the rights and interests of government are the responsibility of appropriate department heads who are responsible for securing documents necessary for continuing operation during times of emergencies.

17.4 RELOCATION OF GOVERNMENT

All critical facilities at the county and at the city level such as the EOC, law enforcement, fire and the courthouse should have an alternate location if evacuation becomes necessary. Educational facilities, public works buildings, jails, communications centers, fire halls and law enforcement centers are possible relocation facilities as they already contain considerable

19.20 Shelter In Place

GUIDELINES FOR STAYING PUT

Whether you are at home, work or elsewhere, there may be situations when it's simply best to stay where you are and avoid any uncertainty outside.

There may be circumstances when staying put and creating a barrier between yourself and potentially contaminated air outside, a process known as "sealing the room," is a matter of survival.

Use common sense and available information to assess the situation and determine if there is immediate danger. If you see large amounts of debris in the air, or if local authorities say the air is badly contaminated, you may want to take this kind of action.

The process used to seal the room is considered a temporary protective measure to create a barrier between you and potentially contaminated air outside. It is a type of sheltering in place that requires preplanning.

- Bring your family and pets inside.
- Lock doors, close windows, air vents and fireplace dampers.
- Turn off fans, air conditioning and forced air heating systems.
- Take your emergency supply kit unless you have reason to believe it has been contaminated.
- Go into an interior room with few windows, if possible.
- Seal all windows, doors and air vents with 2-4 mil. thick plastic sheeting and duct tape. Consider measuring and cutting the sheeting in advance to save time.
- Cut the plastic sheeting several inches wider than the openings and label each sheet.
- Duct tape plastic at corners first and then tape down all edges.
- Be prepared to improvise and use what you have on hand to seal gaps so that you create a barrier between yourself and any contamination.
- Local authorities may not immediately be able to provide information on what is happening and what you should do. However, you should watch TV, listen to the radio or check the Internet often for official news and instructions as they become available.

Shelter-In-Place Kit

You should gather these items together in a box and have ready for any emergency:

- Plastic for windows
- Duct tape
- Towel for under door
- Commercially processed bottled water and food that won't spoil.
- Sanitation supplies
- Radio, flashlight, and extra batteries
- First Aid Kit that includes prescription medication and toiletries.

NOAA All Hazards Radio

Besides severe weather information,
hazardous material spill information can be
heard 24 hours a day on an all hazards radio.

Glossary of Terms

Words, phrases, abbreviations, and acronyms relevant to emergency management should be defined. Many terms in emergency management have special meanings, so it is important to establish precise definitions. Such definitions allow the users of the EOP to share an understanding of the EOP.

American Red Cross-The American Red Cross is a humanitarian organization, led by volunteers, that provides relief to victims of disasters and helps people prevent, prepare for, and respond to emergencies. It does this through services that are consistent with its Congressional Charter and the Principles of the International Red Cross Movement.

Attack- A hostile action taken against the United States by foreign forces or terrorists, resulting in the destruction of or damage to military targets, injury or death to the civilian population, or damage or destruction to public and private property.

Checklist -Written (or computerized) enumeration of actions to be taken by an individual or organization, meant to aid memory rather than provide detailed instruction.

Chief Executive Official-The official of the community who is charged with authority to implement and administer laws, ordinances, and regulations for the community. He or she may be a mayor, city manager, etc.

Community- A political entity which has the authority to adopt and enforce laws and

ordinances for the area under its jurisdiction. In most cases, the community is an incorporated town, city, township, village, or unincorporated area of a county. However, each State defines its own political subdivisions and forms of government.

Contamination-The undesirable deposition of a chemical, biological, or radiological material on the surface of structures, areas, objects, or people.

Dam- A barrier built across a watercourse for the purpose of impounding, controlling, or diverting the flow of water.

Damage Assessment-The process used to appraise or determine the number of injuries and deaths, damage to public and private property, and the status of key facilities and services such as hospitals and other health care facilities, fire and police stations, communications networks, water and sanitation systems, utilities, and transportation networks resulting from a man-made or natural disaster.

Decontamination- The reduction or removal of a chemical, biological, or radiological material from the surface of a structure, area, object, or person.

Disaster- An occurrence of a natural catastrophe, technological accident, or human caused

event that has resulted in severe property damage, deaths, and/or multiple injuries. As used in this Guide, a "large-scale disaster" is one that exceeds the response capability of the local jurisdiction and requires State, and potentially Federal, involvement. As used in the Stafford Act, a "major disaster" is "any natural catastrophe [...] or, regardless of cause, any fire, flood, or explosion, in any part of the United States, which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster assistance under [the] Act to supplement the efforts and available resources or States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby."

Disaster Field Office-The office established in or near the designated area of a Presidentially declared major disaster to support Federal and State response and recovery operations. The DFO houses the FCO and ERT, and where possible, the SCO and support staff.

Disaster Recovery Center-Places established in the area of a Presidentially declared major disaster, as soon as practicable, to provide victims the opportunity to apply in person for assistance and/or obtain information relating to that assistance. DRCs are staffed by local, State, and Federal agency representatives, as well as staff from volunteer organizations (e.g., the ARC).

Dose (Radiation)-A general term indicating the quantity (total or accumulated) of ionizing radiation or energy absorbed by a person or animal.

Dose Rate- The amount of ionizing radiation which an individual would absorb per unit of time.

Dosimeter- An instrument for measuring and registering total accumulated exposure to ionizing radiation.

Earthquake- The sudden motion or trembling of the ground produced by abrupt displacement of rock masses, usually within the upper 10 to 20 miles of the earth's surface.

Electromagnetic Pulse-A sharp pulse of energy radiated instantaneously by a nuclear detonation which may affect or damage electronic components and equipment.

Emergency- Any occasion or instance--such as a hurricane, tornado, storm, flood, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, fire, explosion, nuclear accident, or any other natural or man-made catastrophe--that warrants action to save lives and to protect property, public health, and safety.

Emergency Alert System-A digital technology (voice/text) communications system consisting of broadcast stations and interconnecting facilities authorized by the Federal Communication Commission. The system provides the President and other national, State, and local officials the means to broadcast emergency information to the public before, during, and after disasters.

Emergency Environmental Health Services-Services required to correct or improve damaging environmental health effects on humans, including inspection for food contamination, inspection for water contamination, and vector control; providing for sewage and solid waste inspection and disposal; clean-up and disposal of hazardous materials; and sanitation inspection for emergency shelter facilities.

Emergency Health Services-Services required to prevent and treat the damaging health effects of an emergency, including communicable disease control, immunization, laboratory services, dental and nutritional services; providing first aid for treatment of ambulatory patients and those with minor injuries; providing public health information on emergency treatment, prevention, and control; and providing administrative support including maintenance of vital records and providing for a conduit of emergency health funds from State and Federal governments.

Emergency Medical-Services, including personnel, facilities, and equipment required to ensure proper medical care for the sick and injured from the time of injury to the time of *Services* of final disposition, including medical disposition within a hospital, temporary medical facility, or special care facility, release from site,

or declared dead. Further, emergency medical services specifically include those services immediately required to ensure proper medical care and specialized treatment for patients in a hospital and coordination of related hospital services.

Emergency Mortuary Services-Services required to assure adequate death investigation, identification, and disposition of bodies; removal, temporary storage, and transportation of bodies to temporary morgue facilities; notification of next of kin; and coordination of mortuary services and burial of unclaimed bodies.

Emergency Operating Center-The protected site from which State and local civil government officials coordinate, monitor, and direct emergency response activities during an emergency.

Emergency Operations Plan-A document that: describes how people and property will be protected in disaster and disaster threat situations; details who is responsible for carrying out specific actions; identifies the personnel, equipment, facilities, supplies, and other resources available for use in the disaster; and outlines how all actions will be coordinated.

Emergency Planning Zones-Areas around a facility for which planning is needed to ensure prompt and effective actions are taken to protect the health and safety of the public if an accident occurs. The REP Program and CSEPP use the EPZ concept. In the REP Program, the two EPZs are:

☐☐☐ **Plume Exposure Pathway (10-mile EPZ)**. A circular geographic zone (with a 10-mile radius centered at the nuclear power plant) for which plans are developed to protect the public against exposure to radiation emanating from a radioactive plume caused as a result of an accident at the nuclear power plant.

☐☐☐ **Ingestion Pathway (50-mile EPZ)**. A circular geographic zone (with a 50-mile radius centered at the nuclear power plant) for which plans are developed to protect the public from the ingestion of water or foods contaminated as the result of a nuclear power plant accident. In CSEPP, the EPZ is divided into three concentric circular zones:

☐☐☐ **Immediate Response Zone (IRZ)**. A circular zone ranging from 10 to 15 km (6 to 9 miles) from the potential chemical event source, depending on the stockpile location on-post. Emergency response plans developed for the IRZ must provide for the most rapid and effective protective actions possible, since the IRZ will have the highest concentration of agent and the least amount of warning time.

☐☐☐ **Protective Action Zone (PAZ)**. An area that extends beyond the IRZ to approximately 16 to 50 km (10 to 30 miles) from the stockpile location. The PAZ is that area where public protective

actions may still be necessary in case of an accidental release of chemical agent, but where the available warning and response time is such that most people could evacuate. However, other responses (e.g., sheltering) may be appropriate for institutions and special populations that could not evacuate within the available time.

☐☐☐ **Precautionary Zone (PZ)**. The outermost portion of the EPZ for CSEPP, extending from the PAZ outer boundary to a distance where the risk of adverse impacts to humans is negligible. Because of the increased warning and response time available for implementation of response actions in the PZ, detailed local emergency planning is not required, although consequence management planning may be appropriate.

Emergency Response Team-An interagency team, consisting of the lead representative from each Federal department or agency assigned primary responsibility for an ESF and key members of the FCO's staff, formed to assist the FCO in carrying out his/her coordination responsibilities. The ERT may be expanded by the FCO to include designated representatives of other Federal departments and agencies as needed. The ERT usually consists of regional-level staff.

Emergency Response Team Advance Element-For Federal disaster response and recovery activities under the Stafford Act, the portion of the ERT that is first deployed to the field to respond to a disaster incident. The ERT-A is the nucleus of the full ERT.

Emergency Response Team National-An ERT that has been established and rostered for deployment to catastrophic disasters where the resources of the FEMA Region have been, or are expected to be, overwhelmed. Three ERT-Ns have been established.

Emergency Support Function-In the FRP, a functional area of response activity established to facilitate the delivery of Federal assistance required during the immediate response phase of a disaster to save lives, protect property and public health, and to maintain public safety. ESFs represent those types of Federal assistance which the State will most likely need because of the impact of a catastrophic or significant disaster on its own resources and response capabilities, or because of the specialized or unique nature of the assistance required. ESF missions are designed to supplement State and local response efforts.

Emergency Support Team-An interagency group operating from FEMA headquarters. The EST oversees the national-level response support effort under the FRP and coordinates activities with the ESF primary and support agencies in supporting Federal requirements in the field.

Evacuation- Organized, phased, and supervised dispersal of people from dangerous or potentially dangerous areas.

Spontaneous Evacuation. Residents or citizens in the threatened areas observe an emergency event or receive unofficial word of an actual or perceived threat and without receiving instructions to do so, elect to evacuate the area. Their movement, means, and direction of travel is unorganized and unsupervised.

Voluntary Evacuation. This is a warning to persons within a designated area that a threat to life and property exists or is likely to exist in the immediate future. Individuals issued this type of warning or order are NOT required to evacuate, however it would be to their advantage to do so.

Mandatory or Directed Evacuation. This is a warning to persons within the designated area that an imminent threat to life and property exists and individuals MUST evacuate in accordance with the instructions of local officials.

Evacuees- All persons removed or moving from areas threatened or struck by a disaster.

Exposure (Radiological)-A quantitative measure of gamma or x-ray radiation at a certain place based on its ability to produce ionization in air.

Exposure Rate(Radiological)-The amount of ionizing radiation to which an individual would be exposed or which he or she would receive per unit of time.

Federal Coordinating Officer-The person appointed by the President to coordinate Federal assistance in a Presidentially declared emergency or major disaster.

Field Assessment Team-

A small team of pre-identified technical experts that conduct an assessment of response needs (not a PDA) immediately following a disaster. The experts are drawn from FEMA, other agencies and organizations--such as the U.S. Public Health Service, U.S. Army Corps of Engineers, U.S. Environmental Protection Agency, and the American Red Cross--and the affected State(s). All FAST operations are joint Federal/State efforts.

Flash Flood- Follows a situation in which rainfall is so intense and severe and runoff so rapid

that it precludes recording and relating it to stream stages and other information in time to forecast a flood condition.

Flood- A general and temporary condition of partial or complete inundation of normally dry land areas from overflow of inland or tidal waters, unusual or rapid accumulation or runoff of surface waters, or mudslides/mudflows caused by accumulation of water.

Governor's Authorized Representative-The person empowered by the Governor to execute, on behalf of the State, all necessary documents for disaster assistance.

Hazard Mitigation-Any action taken to reduce or eliminate the long-term risk to human life and

property from hazards. The term is sometimes used in a stricter sense to mean cost-effective measures to reduce the potential for damage to a facility or facilities from a disaster event.

Hazardous Material-Any substance or material that when involved in an accident and released in sufficient quantities, poses a risk to people's health, safety, and/or property. These substances and materials include explosives, radioactive materials, flammable liquids or solids, combustible liquids or solids, poisons, oxidizers, toxins, and corrosive materials.

High-Hazard Areas-Geographic locations that for planning purposes have been determined through historical experience and vulnerability analysis to be likely to experience the effects of a specific hazard (e.g., hurricane, earthquake, hazardous materials accident, etc.) resulting in vast property damage and loss of life.

Hurricane- A tropical cyclone, formed in the atmosphere over warm ocean areas, in which wind speeds reach 74 miles per hour or more and blow in a large spiral around a relatively calm center or "eye". Circulation is counter-clockwise in the Northern Hemisphere and clockwise in the Southern Hemisphere.

Incident Command System-A standardized organizational structure used to command, control, and coordinate the use of resources and personnel that have responded to the scene of an emergency. The concepts and principles for ICS include common terminology, modular organization, integrated communication, unified command structure, consolidated action plan, manageable span of control, designated incident facilities, and comprehensive resource management.

Joint Information Center-A central point of contact for all news media near the scene of a large-scale disaster. News media representatives are kept informed of activities and events by public information officials who represent all participating Federal, State, and local agencies that are collocated at the JIC.

Joint Information System-Under the FRP, connection of public affairs personnel, decision-makers, and news centers by electronic mail, fax, and telephone when a single Federal-State-local JIC is not a viable option.

Mass Care- The actions that are taken to protect evacuees and other disaster victims from the effects of the disaster. Activities include providing temporary shelter, food, medical care, clothing, and other essential life support needs to those people that have been displaced from their homes because of a disaster or threatened disaster.

Nuclear Detonation-An explosion resulting from fission and/or fusion reactions in nuclear material, such as that from a nuclear weapon.

Public Information Officer-A Federal, State, or local government official responsible for preparing and coordinating the dissemination of emergency public information.

Preliminary Damage Assessment-A mechanism used to determine the impact and magnitude of damage and the resulting unmet needs of individuals, businesses, the public sector, and the community as a whole. Information collected is used by the State as a basis for the Governor's request for a Presidential declaration, and by FEMA to document the recommendation made to the President in response to the Governor's request. PDAs are made by at least one State and one Federal representative. A local government representative familiar with the extent and location of damage in the community often participates; other State and Federal agencies and voluntary relief organizations also may be asked to participate, as needed.

Radiation Sickness-The symptoms characterizing the sickness known as radiation injury, resulting from excessive exposure of the whole body to ionizing radiation.

Radiological Monitoring-The process of locating and measuring radiation by means of survey instruments that can detect and measure (as exposure rates) ionizing radiation.

Recovery- The long-term activities beyond the initial crisis period and emergency response phase of disaster operations that focus on returning all systems in the community to a normal status or to reconstitute these systems to a new condition that is less vulnerable.

Regional Operating Center-The temporary operations facility for the coordination of Federal response and recovery activities, located at the FEMA Regional Office (or Federal Regional Center) and led by the FEMA Regional Director or Deputy Director until the DFO becomes operational. Once the ERT-A is deployed, the ROC performs a support role for Federal staff at the disaster scene.

Resource Management-Those actions taken by a government to: identify sources and obtain resources needed to support disaster response activities; coordinate the supply, allocation, distribution, and delivery of resources so that they arrive where and when most needed; and maintain accountability for the resources used.

Secondary Hazard-A threat whose potential would be realized as the result of a triggering event that of itself would constitute an emergency. For example, dam failure might be a secondary hazard associated with earthquakes.

Standard Operating Procedure-A set of instructions constituting a directive, covering those features of operations which lend themselves to a definite, step-by-step process of accomplishment. SOPs supplement EOPs by detailing and specifying how tasks assigned in the EOP are to be carried out.

State Coordinating Officer-The person appointed by the Governor to coordinate State, Commonwealth, or Territorial response and recovery activities with FRP-related activities of the Federal Government, in cooperation with the FCO.

State Liaison- A FEMA official assigned to a particular State, who handles initial coordination with the State in the early stages of an emergency.

Storm Surge- A dome of sea water created by the strong winds and low barometric pressure in a hurricane that causes severe coastal flooding as the hurricane strikes land.

Terrorism- The use of--or threatened use of--criminal violence against civilians or civilian infrastructure to achieve political ends through fear and intimidation, rather than direct confrontation. Emergency management is typically concerned with the consequences of terrorist acts directed against large numbers of people (as opposed to political assassination or hijacking, which may also be considered "terrorism").

Tornado- A local atmospheric storm, generally of short duration, formed by winds rotating at very high speeds, usually in a counter-clockwise direction. The vortex, up to several hundred yards wide, is visible to the observer as a whirlpool-like column of winds rotating about a hollow cavity or funnel. Winds may reach 300 miles per hour or higher.

Tsunami- Sea waves produced by an undersea earthquake. Such sea waves can reach a height of 80 feet and can devastate coastal cities and low-lying coastal areas.

Warning- The alerting of emergency response personnel and the public to the threat of extraordinary danger and the related effects that specific hazards may cause. A warning issued by the NWS (e.g., severe storm warning, tornado warning, tropical storm warning) for a defined area indicates that the particular type of severe weather is imminent in that area.

Watch- Indication by the NWS that, in a defined area, conditions are favorable for the specified type of severe weather (e.g., flash flood watch, severe thunderstorm watch, tornado watch, tropical storm watch).
